Read the following passage and answer the questions given after it.

Four weeks ago I was late for work. I left my house five minutes later than usual and I saw my bus approaching the bus stop. I began to run, but I was too slow. I waited ten minutes for another bus and I was still gasping for air when it arrived. The next day I gave up smoking. For the first few days I was very irritable, but now I feel much better. Now I ask: Why do people smoke?

Every year teams of doctors publish reports saying that smoking is dangerous for your health. Every year the Government pays for the advertisements telling people that smoking is bad for them. But there are millions of people who still smoke twenty or thirty cigarettes a day.

In some countries advertisements for cigarettes are not allowed on television. If you read a newspaper or a magazine you will see cigarettes advertisements but at the bottom of each advertisement you will see the government health warning – Cigarette smoking is injurious to health. You can see this warning on the cigarette packets also. And yet people die from the effects of smoking. One wonders why people smoke!

Experts in various fields say that it is difficult to understand why people begin to smoke and why they make it a habit. Most people start smoking because other people around them do it. Children feel it makes them seem adult to smoke, and other children also encourage them to smoke. Some children see their parents smoking, so they start smoking too.

The effect that smoking has on a person helps to make it a habit. Cigarettes contain nicotine which has an effect on the heart and the nervous system. Smoking one or two cigarettes causes an increase in the heart rate and a slight rise in blood pressure. The effect of smoking on the nervous system is that it reduces tension and helps to relax. People want these effects or feel they need them and start depending on them and they go on smoking.

दिये गए पाठ्यांश को पढ़ें और इस पर आधारित प्रश्नों के उत्तर दें।

चार सप्ताह पहले मुझे काम पर जाने में देरी हो गई थी। मैं रोज
के मुकाबले पांच मिनट की देरी से घर से निकला और मैंने बस को

बस स्टॉप की ओर आते देखा। मैं दौड़ा, लेकिन मैं बहुत धीमा था।

मैंने दूसरी बस के लिए दस मिनट इंतजार किया और मैं उसके

आने तक हांफ ही रहा था। अगले दिन मैंने धूमपान छोड़ दिया।

शुरू के कुछ दिनों में मुझे बहुत चिड़चिड़ाहट हुई, पर अब मुझे बहुत

अच्छा लग रहा है। अब मैं यह सोचता हूँ: लोग धूमपान करते क्यों

हैं?

हर साल डॉक्टरों की टीम रिपोर्ट प्रकाशित करती हैं जो बताती हैं कि धूमपान आपके स्वास्थ्य के लिए खतरनाक है। सरकार हर साल विज्ञापन द्वारा लोगों को यह बताने के लिए पैसे खर्च करती है कि धूमपान उनके लिए हानिकारक है। लेकिन इसके बावजूद लाखों लोग ऐसे हैं जो रोज बीस से तीस सिगरेट पी जाते हैं।

कुछ देशों में टीवी पर सिगरेट के विज्ञापन की अनुमति नहीं है।
यदि आप किसी अखबार या पत्रिका को पढ़ते हुए सिगरेट का
विज्ञापन देखते हैं तो प्रत्येक विज्ञापन के नीचे आप सरकारी
स्वास्थ्य चेतावनी देखेंगे - सिगरेट पीना स्वास्थ्य के लिए
हानिकारक हैं। आप यह चेतावनी सिगरेट के पैकेट पर भी देख
सकते हैं। और फिर भी लोग धूमपान की वजह से मरते हैं। किसी
को भी ताज्जुब होगा कि लोग धूमपान क्यों करते हैं!

विभिन्न क्षेत्रों के विशेषज्ञों का कहना है कि यह समझना मुश्किल है कि लोग धूमपान क्यों शुरू करते हैं और क्यों इसे अपनी आदत बना लेते हैं। अधिकांश लोग इसलिए धूमपान शुरू करते हैं क्योंकि उनके आस-पास के लोग ऐसा करते हैं। बच्चों को यह लगता है कि धूमपान से वे वयस्क दिखने लगेंगे, और दूसरे बच्चे भी उन्हें धूमपान के लिए उकसाते हैं। कुछ बच्चे अपने माता-पिता को धूमपान करते हुए देखते हैं, इसलिए वे भी धूमपान करना शुरू कर देते हैं।

व्यक्ति पर धूमपान का ऐसा प्रभाव पड़ता है जो उसे इसका आदी बना देता है। सिगरेट में निकोटिन होता है जो हदय और तंत्रिका तंत्र पर अपना प्रभाव डालता है। एक या दो सिगरेट पीने से हदय गति बढ़ती है और रक्तचाप में हल्की वृद्धि होती है। तंत्रिका तंत्र पर इसका प्रभाव यह होता है कि यह तनाव कम करता है और आराम महसूस कराने में मदद करता है। लोग इन प्रभावों को पसंद करते हैं या इसकी आवश्यकता महसूस करते हैं और इस पर निर्भर होते जाते हैं जिस कारण वे धूमपान जारी रखते हैं। Question Number: 53 Question Id: 973597570 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes

India is now better positioned to collaborate internationally and step up climate-friendly nuclear power generation than ever before, following ratification of the Convention on Supplementary Compensation (CSC) for Nuclear Damage. The CSC was adopted on 12 September 1997, together with the Protocol to Amend the Vienna Convention on Civil Liability for Nuclear Damage, and entered into force on 15 April 2015. It aims at increasing the amount of compensation available in the event of a nuclear incident through public funds to be made available by the Contracting Parties on the basis of their installed nuclear capacity and UN rate of assessment. It also aims at establishing treaty relations among States. However, supplier's concerns on the extent of their liability in case of an accident would be finally settled once the Supreme Court gives its verdict on a challenge to India's civil nuclear liability law pending before it, supplemented with questions that should be posted on different contingencies. The fine print of the law has effectively prevented us from stepping up investment in nuclear power for over five years. While the Indo-US nuclear deal of 2008 was indeed path-breaking, ending as it did India's veritable global isolation in the domain of nuclear and, more broadly, a range of dual-use technologies. India's subsequent nuclear liability law of 2010 was seen by several potential overseas suppliers as being out of sync with global norms. Our now ratifying the Convention on Supplementary Compensation, which provides clear-cut norms and parameters on a nuclear operator's financial liability, should provide much-needed investor comfort for foreign suppliers. India did sign the convention back in 2010, but its ratification has taken longer than warranted. Fortunately, there has been progress in nuclear cooperation of late. There's now far better access to nuclear fuel from abroad, and plans to set up several new plants with suppliers from the US, Russia and France are reportedly well advanced. We must leverage our diplomatic skills and international goodwill to gain access to the Nuclear Suppliers' Group without further delay. With promising developments in fusion energy, being part of the international effort to harness nuclear energy is of vital importance. Indian equipment makers and suppliers could reap scale economies and standardise vital parts and components, which, in turn, would bring down costs and keep the price of nuclear power attractive. Nuclear energy has to play its role in contributing to growth without greenhouse gas emissions. The fine print of the law has effectively prevented us from stepping up investment in nuclear power for over five years. While the Indo-US nuclear deal of 2008 was indeed path-breaking, ending as it did India's veritable global isolation in the domain of nuclear and, more broadly, a range of dual-use technologies.
