Either you can select the cell and then click in the formula bar to edit there or you can edit the data right in the cell.

2. 🗸

To edit data in a cell, single-click the cell and place the insertion point wherever you need to edit.

7 #

Double-click in the cell and either type the new information or delete the information that is incorrect in edit mode.

4 14

Editing directly in a cell is useful when you are editing text in a cell, and it is even more useful when you are working with formulas.

# The Olympics

The four yearly cycle of the modern Olympics has in the past few decades been disrupted by global warfare, terrorist outrage and political boycott. Revived in 1896 as a form for peaceful competition between the finest athletes in the world, the Games have also reflected national rivalries. Even in ancient Greece, where the original Olympics took place, there had been feuds among its states. But once every four years in the month of July, internal warfare was formally suspended and the athletes and the interested people moved towards Olympia. Today the ruins of Olympia still stand testimony to the glory of the Games. The site lies in the south of Greece. Archaeological evidence indicates that Olympia was a place of worship even in prehistoric times. Later, it became particularly associated with festivities honouring Zeus, greatest of gods — who started a tradition of games at Olympia. Whatever the reality behind the legend is, history records that in 776 BC, the warring kings signed a sacred peace pact. To honour their contract, foot races were held at Olympia. The names of the winning contestants were written down, and the records of the Olympics provide the central chronology of Ancient Greek history.

The Games expanded over the centuries. To the original foot races were added races on horseback and in chariots, jumping and throwing events, and several forms of unarmed combat. In the 5th century BC, a fixed programme was agreed, with separate contests for men and for boys. The Games had become the supreme festival in ancient Greece.

Women were not allowed to compete in the main Games. They had a separate four yearly festival held in honour of Hera, wife of Zeus. During these celebrations, also held at Olympia, a foot race was organised for women, but it was entirely unrelated to the main festival. The only exception to the ban on women occurred in the chariot races, where the owner of the horses rather than the charioteer was considered the winner. Women could and did win as owners though they were never allowed to take part themselves.

When the ceremony was over, the Olympic champions would walk in a majestic procession. The cheering of their admirers was tumultuous.

# ओलंपिक

पिछले कुछ दशकों से मॉडर्न ओलंपिक का चार साल का चक्र वैश्विक युद्ध, आतंकी उपद्रव और राजनीतिक बहिष्कार के कारण बाधित हो गया था। 1896 में द्निया के बेहतरीन एथलीटो के बीच शांतिपूर्ण प्रतिस्पर्धा के लिए यह पुनर्जीवित हुआ, खेलों ने राष्ट्रीय प्रतिद्वंदता को भी प्रतिविंबित किया। यहां तक कि प्राचीन शीक में जहां मूल ओलंपिक हुए, वहां के राज्यों के बीच युद्ध हुए थे। लेकिन चार सालों में एक बार ज्लाई के महिने में आंतरिक युदों को औपचारिक रूप से निलंबित किया गया था और एथलीट तथा इच्छुक लोग ओलंपिया की ओर बढ़ें। आज भी ओलंपिया का पतन खेल के गौरव को दर्शाता है। यह स्थान ग्रीस के दक्षिण में स्थित है। पुरातात्विक सब्त बताते हैं कि ओलंपिया प्रागैतिहासिक काल में भी पूजा का स्थान रहा था। बाद मे यह महान देवता जीउस का सम्मान करने वाले उत्सवीं से जुड़ गया जिन्होंने ओलंपिया में खेल की परंपरा को शुरू किया था। पौराणिक कथाओं के पीछे जो भी सत्य हो लेकिन इतिहास का रिकॉर्ड है कि 776 ईसा.पूर्व में, युद्ध करने वाले राजाओं ने एक पवित्र शांत संधि पर हस्ताक्षर किए थे। अपने समझौते का सम्मान करने के लिए, ओलंपिया में फुट रेस आयोजित की गई थी। विजेताओं के नाम दर्ज किए गए थे और ओलंपिया के रिकॉर्ड प्राचीन ग्रीक के इतिहास का केंद्रिय कालक्रम बताते हैं। सदिया बितती गई और खेलों का विस्तार हुआ। मूल फुट रेस के साथ ही घुड़सवारी दौड़ और रथ दौड़, जंपिंग और थोइंग इवेंट और कई तरह के अनुआर्म्ड कौर्स्बेट रूप इसमें आयोजित हुए। 5वीं शताब्दी ईसा पूर्व में पुरूषों और लड़कों के लिए अलग अलग प्रतियोगिताओं को लेकर एक निश्चित कार्यक्रम पर सहमति हुई थी। प्राचीन ग्रीस में यह खेल सर्वोच्च त्यौहार बन गया था। महिलाओं को मुख्य खेलों में प्रतिरूपर्धा करने की अनुमति नहीं थी। उनके लिए अलग चार वर्षों में एक बार उत्सव रखा जाता था जो जीउस की पत्नी हेरा के सम्मान में आयोजित होता था। इन उत्सवों के दौरान ओलंपिया में भी महिलाओं के लिए फुट रेस आयोजित की गई, लेकिन यह प्रूषों के मुख्य त्यौहार से पूर्ण रूप से अलग थी। महिलाओं पर प्रतिबंध का एकमात्र अपवाद रथ दौड़ में हुआ था, जहां रथ चलानों वालों के बजाय विजेता घोड़ों के मालिको को माना जाता था। महिलाएं घोड़े के मालिकों के रूप में विजेता बन सकती थी हालांकि उन्हें स्वयं इसमें भाग लेने की अनुमति नहीं थी। समारोह की समाप्ति पर ओलंपिक चैंपियनों को राजसी जुलूस में चलना होता था। उनके प्रशंसकों की जयकार बेहद उत्साहपूर्ण होती थी।

A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of letters as in the two given matrices. The columns and rows of Matrix I are numbered from 0 to 4 and those of Matrix II from 5 to 9. A letter from these matrices can be represented first by its row and then the column number; e.g S can be represented by 14, 21, etc. Similarly you have to identify the correct set for the word SOLE.

Matrix I

	0	1	2	3	4
0	A	E	S	Т	Н
1	Т	Н	Α	Е	S
2	E	S	T	Н	A
3	Н	Α	Е	S	T
4	S	T	Н	A	E

Matrix II

	5	6	7	8	9
5	P	Q	R	K	L
6	K	L	P	0	R
7	О	R	K	L	P
8	L	P	О	R	K
9	R	K	L	Р	O

**Options:** 

41,57,87,31

33,99,66,44

21,75,44,02

02,78,87,13

Science contributes to an overall understanding of how and why things work. It explains the reason behind the daily functioning of complex systems that range from the human body to modern transportation. Students and children use this knowledge to understand and learn new concepts, peruse new interests and make well-informed decisions. It also provides tactical proof of many facts we read in books or see on television. Hence, science helps children to understand things better and increase their capability to learn. Science knows no boundaries as it is a universal subject. After years of active and persistent efforts, this subject claimed to be a part of the school curriculum and got recognized. It has proved indispensable for the existence of man and has revolutionized human life. Supremacy of Science has now been established in every field and thus it is necessary to educate the students on this subject. The tempo of our lives has also been quickened. A new social and political outlook has been given to the man altogether. Hence, the study of science has become a necessity in this age and without learning the modern science, a man is like a lame individual with no sense of the modern era. Here is why it is important to learn the wonders of science at the school level. Science provides exclusive teaching on inspection and reasoning. It makes the students form an objective judgment. It is extremely helpful for our supervision in life. We exist in a world of scientific inventions. So science education cannot be ignored. Science is also taught to offer training and knowledge of scientific methods. Awareness of the methods of observation and experimentation in the different fields of science helps students develop a logical brain, a significant judgment and a capacity for disciplined organization. Science provides remedies for any defects in the ordinary school education. It is considered to be the most valuable element in the education of those who show special ability. It instructs the children to use their leisure properly and is clearly illustrated in scientific hobbies. It has its own literature and cultural values. The scientific discoveries of Newton, Darwin, Armstrong, and others are treasures for mankind and hence science has won the first rank in Humanistic studies. The study of science and technology proceed as an everlasting urge to obtain knowledge. The more we know of the secrets of nature, the more we understand how much remains unidentified. We are learning as much of the secrets of the molecular cells in a living organism as of the atoms in space. Hence, the modern syllabus of studies must comprise the study of science and technology, as it assists a scientific mind in resolving the problems of life.
