## Read the following passage and answer the questions that follow:

Mountaineer, adventurer, explorer, author, Reinhold Messner stands atop the world because of his astonishing feats. This conquest of the highest and some of the most difficult peaks of the world have earned him the status of the greatest climber in history.

Messner's interest in the mountains began early in life. He climbed his first summit at the age of five. When he was thirteen, he began climbing with his brother Gunther, two years younger than him. By the time Rienhold and Gunther were in their early twenties, they were among Europe's best climbers.

Reinhold became one of the first and most enthusiastic supporters of Alpine style of mountaineering in the Himalayas. It consisted of climbing with very light equipment and minimum external help. He thought the usual style was disrespectful towards nature and the mountains.

In his first major Himalayan climb I 1970, he and his brother scaled the Nanga Parbat. But the success turned into a tragedy when his brother died. Messner lost six toes, which had become badly frostbitten during the climb and required amputation.

In the 1970s Messner started championing the cause for climbing Mount Everest without carrying any oxygen, saying that he would do the climbing in a natural way. In 1978, he reached the summit of Everest. He proved what certain doctors, specialists and mountaineers thought was impossible. He repeated the feat from the Tibetan side in 1980, during the monsoon season.

Messner today carries on business related to mountaineering skills. He is also one of the founders of Mountain Wilderness, an international NGO dedicated to the protection of mountains worldwide.

In 2004, he completed a 2000 Km expedition through the Gobi Desert. He now mainly devotes himself to the Messner Mountain Museum, of which he is the founder.

Correct: 1 Wrong: 0
Messner's interest in the mountains began early in
life – here 'early in life' refers to when Messner was
years old.
Options:
1.  ✓ five
2. * eleven
3 * thirteen
4. * twenties
Question Number: 54 Question Id: 819657217 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yo Single Line Question Option: No Option Orientation: Vertical Correct: 1 Wrong: 0
Alpine style of climbing consists of:
Options:
1. * disrespect for nature and mountains
2. * climbing a mountain all alone
3. * climbing the Alps mountains
4. climbing with few tools and little help
Question Number: 55 Question Id: 819657218 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yo Single Line Question Option: No Option Orientation: Vertical Correct: 1 Wrong: 0
To Messner, 'climbing in a natural way' meant to
climb:
Options:
1. * all alone
2. * with a team
with a lot of helpers
4. without carrying oxygen

निम्नलिखित अनुच्छेद को पढ़कर दिए गए पश्नों के उत्तर दें :

पर्वतारोही, साहसी, खोजकर्त्ता, लेखक रेनहोल्ड मेस्नर अपने
अद्भुत कार्यों के कारण दुनिया के सर्वोच्च शिखर पर है। उच्चतम
और दुनिया की कुछ सबसे कठिन चोटियों पर विजय प्राप्त कर
उन्होंने इतिहास में सबसे महान पर्वतारोही का पद अर्जित किया
है।

पहाड़ों के प्रति इनकी रूचि जीवन के शुरुआत में आरंभ हुई।
पांच साल की आयु में ही इन्होंने अपनी पहली चोटी पर चढ़ाई
की। जब वह तेरह वर्ष के थे तो उन्होंने अपने भाई गुन्थर, जो
उससे दो वर्ष छोटा था, के साथ चढ़ना शुरू कर दिया। जब
रैनहोल्ड और गुन्थर ने अपने बीसवें वर्ष में प्रवेश किया तो वे
यूरोप के सबसे अच्छे पर्वतारोहियों में से थे।
रैनहोल्ड, हिमालय में पर्वतारोहण की अल्पाइन शैली के पहले

रेनहोल्ड, हिमालय में पर्वतारोहण की अल्पाइन शैली के पहले और सबसे उत्साही समर्थकों में से एक बन गए। इसमें बहुत हल्के उपकरणों और न्यूनतम बाहरी सहायता के साथ चढ़ाई शामिल थी। उन्होंने सोचा कि प्रचलित शैली प्रकृति और पहाड़ों के प्रति अपमानजनक थी।

1970 में अपनी पहली प्रमुख हिमालय की चढ़ाई में, उन्होंने और उनके भाई ने नंगा पर्वत पर विजय पा ली। परंतु उनके भाई की मृत्यु के कारण सफलता त्रासदी में बदल गई। मेरनर ने पैर की छह उंगलियां खो दी, जोकि चढ़ाई के दौरान बुरी तरह से ठंड से सुन्न हो गई थी और विच्छेदन आवश्यक हो गया था।

1970 में मेरनर ने माउंट एवरेस्ट पर चढ़ने के लिए ऑक्सीजन के बिना चढ़ाई करने का समर्थन करना शुरू कर दिया और कहा कि वह प्राकृतिक तरीके से चढ़ाई करेंगे। 1978 में, वह एवरेस्ट की चोटी पर पहुंचे। उन्होंने वह प्रमाणित कर दिखाया जो कुछ डॉक्टरों, विशेषजों और पर्वतारोहियों के विचार से असंभव था। उन्होंने मानसून के मौसम के दौरान 1980 में तिब्बत की तरफ से इस सफलता को दोहराया।

मेस्नेर आज पर्वतारोहण कौशल से संबंधित व्यवसाय करते है। वह माउंटेन वाइल्डनेस के संस्थापकों में से एक है, जो विश्व भर में पहाड़ों की सुरक्षा को समर्पित एक अंतरराष्ट्रीय एनजीओ है। 2004 में उन्होंने गोबी रेगिस्तान में अपने 2000 किमी लम्बी यात्रा अभियान को पूरा किया। वह अब मुख्य रूप से मेस्नेर माउंटेन संग्रहालय के लिए समर्पित हैं, जिसके वह संस्थापक है। Question Number: 53 Question Id: 819657216 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes

Single Line Question Option : No Option Orientation : Vertical

Correct: 1 Wrong: 0

मेस्नर की पहाड़ों में रुचि जीवन के शुरुआत में उत्पन्न हुई - यहां 'जीवन के शुरुआत' का अर्थ है जब मेस्नेर \_\_\_\_ वर्ष

## **Options:**

Question Number: 77 Question Id: 819657240 Question Type: TYPING TEST Display Question Number: Yes

Aryabhatta was an extraordinary teacher and scholar who had immense knowledge about mathematics and astronomy. He suggested the heliocentric theory which proved that the sun is located in the centre of the solar system and all the planets revolve around it. In fact he made this discovery way before Copernicus made this discovery in the West. Aryabhatta was born in Kerala and lived from 476 AD to 550 AD, he completed his education from the ancient university of Nalanda and later he moved to Bihar and continued his studies in the great centre of learning located in close proximity to Kusumapura in Bihar and lived in Taregana District in Bihar in the late 5th and early 6th century. The astronomical calculations and deductions suggested by Aryabhatta are extraordinary by the fact that he did not have any modern equipment or instrument to do it. He had a very sharp brain and his dedication and hard work led him to solve the various mysteries of the solar system. He also deduced that the earth is round in shape and rotates along its own axis, which forms the existence of day and night. Many superstitious beliefs were challenged by him and he presented scientific reasons to prove them wrong. He also said that the moon has no light and shines because it reflects light from the sun. He also proved wrong the false belief that eclipse is caused because of the shadows formed by the earth and the moon. Aryabhatta used epicycles in a similar manner to the Greek Philosopher Ptolemy to illustrate the inconsistent movement of some planets. This great astronomer wrote the famous treatise Aryabhatiya, which was based on astronomy in 499 AD. This treatise was acknowledged as a masterpiece. In honour of this excellent work Arvabhatta was made head of the Nalanda University by the Gupta ruler Buddhagupta. Aryabhatiya is a treatise that includes various facts related to Hindu mathematics and astronomy that appeared during those times. The treatise comprises of four chapters that are concerned with sine tables and astronomical constants. It also comprises of rules to calculate the longitudes of the planets by utilizing epicycles and eccentrics and also the rules related to trigonometry and calculation of eclipses. There is a ganita section in the Aryabhatiya, which include various innovative methods for calculating the lengths of the chords of circles by using the half chord method unlike the Greeks who used the full chord method. Aryabhatta is among the mathematicians who brought new deductions and theories in mathematics and astronomy. His contribution to the mathematics cannot be ignored, as he was the one who deduced the approximate value of pi and correct formulas for calculating the areas of triangles and circles.
