Read the following passage and answer the questions given after it.

Despite the fact that too much fat can be harmful, a moderate fat intake is actually essential for the maintenance of good health. Some of the symptoms of fat deficiency include flaking skin, emaciation, reduced functioning of the immune system and fertility problems. Recent studies have linked fat-free diets to increased stress and aggression. In fact, those who try to eliminate fat completely from their food intake may be at risk of eating disorders. A small amount of fat in a meal will produce a feeling of satiety which lasts much longer than the sensation of fullness produced by protein or carbohydrates. At least two spoons of fat per day is needed for the digestive system to absorb vitamins A, D, E and K, which are fat soluble. These vitamins are essential for healthy hair, skin, teeth and eyes. Without the ability to absorb these vitamins, children run the risk of developmental and neurological disorders. Adults need these vitamins to manufacture fertility hormones.

Some types of fats actually reduce harmful cholesterol levels. Polysaturated fats such as corn, soybean and sesame oil and Monosaturated fats like chicken fat and olive oil seem to lower blood cholesterol, while saturated fats-those found in red meat. dairy products and tropical oils seem to raise the level of the kind of cholesterol that accumulates like plague on arterial walls. Paying attention to the type of fat consumed is just as important as reducing total fat intake.

Sub questions

नीचे दिया गया पाठ्यांश पढ़ें और इसके बाद दिये गए प्रश्नों के उत्तर दें।

इस तथ्य के बावजूद कि बहुत अधिक वसा हानिकारक हो सकती है, अच्छा स्वास्थ्य बनाए रखने के लिए सामान्य वसा का सेवन वास्तव में आवश्यक है। वसा की कमी के कुछ लक्षणों में सुखी त्वचा, सामान्य कमजोरी, प्रतिरक्षा प्रणाली का कम काम करना और प्रजनन की समस्याएँ शामिल है। हाल के अध्ययनों में बसा रहित आहार को, तनाव और आक्रामकता में वृद्धि के साथ जोड़ा गया है। वास्तव में, जो लोग अपने भोजन में वसा के सेवन को पूरी तरह से खत्म करने का प्रयास करते हैं, उन्हें भोजन विकारों का खतरा हो सकता है। भोजन में कम मात्रा में वसा का सेवन करना तृप्ति की भावना को पैदा करती है, जोकि प्रोटीन या कार्बोहाइड्रेट द्वारा उत्पादित पूर्णता की अनुभूति की तुलना में अधिक समय तक बनी रहती है। विटामिन ए, डी, ई और के को अवशोषित करने के लिए पाचन तंत्र को प्रतिदिन कम से कम दो चम्मच वसा की आवश्यकता होती है, जोकि वसा में घुलनशील होते हैं। ये विटामिन बालों, त्वचा, दांतों और आंखों के स्वास्थ्य के लिए आवश्यक होते हैं। इन विटामिनों को अवशोषित करने की क्षमता के बिना, बच्चों में विकास और स्नायविक विकारों का खतरा बढ़ जाता है। वयस्कों में प्रजनन हार्मीन बनाने के लिए इन विटामिनों की आवश्यकता होती है।

कुछ प्रकार की वसा, वास्तव में हानिकारक कोलेस्ट्रॉल के स्तर को कम करती हैं। मकई, सोयाबीन और तिल के तेल जैसी बहुसंतृप्त वसा और चिकन वसा और जैतून के तेल जैसे मोनोसंतृप्त वसा रक्त में कोलेस्ट्रॉल को कम करते प्रतीत होते हैं जबिक लाल मांस, डेयरी उत्पादों और उण्णकिटबंधीय तेल में पाए जाने वाली संतृप्त वसा कोलेस्ट्रॉल के ऐसे स्तर को बढ़ाती प्रतीत होती हैं, जोकि धमनी की दीवारों पर प्लाक की तरह जम जाती है। वसा के सेवन करने के प्रकार पर ध्यान देना उतना ही जरूरी है जितना कि कुल वसा के सेवन को कम करने पर ध्यान देना।

The role of men and women has been somewhat defined since the ancient times. Males have been given more importance because of various factors such as building of civilizations, hunting, getting food as well as other explorations over ages. On the other hand, the subtle contribution of women in fostering culture amongst other things has not been appreciated enough. However, women have started to show that they are as capable as men. Although, a large chunk of male population continues to be the breadwinner of the household, yet the women do seem to be matching them steadily. The world order has undergone a tremendous transformation over the last few decades. This changed order pose interesting questions, like what if women played a more decisive role and begin to dominate the entire world. The signs are already visible and it is the right time to accept that women power is here to stay and is only likely to increase. The first Prime Ministers such as Indira Gandhi of India and Margaret Thatcher of England have proven to be strong leaders. Women have also demonstrated their mettle in intellectual, creative and scientific fields with superb elegance. Not just this, they have made a big difference to the world through outstanding examples of social service. Mother Teresa, Oprah Winfrey, Coco Chanel, Marie Curie, Madonna, Indra Nooyi, Angela Merkel and Aung Sang Suu Kyi have been some of the most powerful women who have had a huge impact on the world through their chosen professions or work. In simple words, women have risen from the shadows of men and carved out their own identity. The world certainly stood up and noticed the change. Besides the extremely powerful women leaders, there are also women who are establishing their identity in the so-called male dominated world. This is commendable, as traditional societies only witnessed women lending a shoulder to men in their various pursuits. Their own power or abilities always remained latent. From being a wife to being a mother or just managing the house chores, women demonstrate their ability to handle multiple tasks with complete ease. They are the ones, who bring a certain level of compassion, love, beauty and virtue to the everyday life. A study by World Bank had revealed that countries having higher number of women in parliament had lower levels of corruption. So, it can be said that the female gender certainly possess the toughness to manage tasks in hand and also deal with people. However, we cannot neglect the fact that managing the world entails a certain degree of cruelty that women might not engage in. The necessity of cracking the whip on people may take a back seat as women are known to be gentler.
