Monks in Meditation

Three monks decided to practice meditation together. They sat by the side of a lake and closed their eyes in concentration. Then, suddenly, the first one stood up and said, "I forgot my mat". He stepped onto the water and miraculously walked across the lake to their hut on the other side. When he returned, the second monk stood up and said," I forgot to put my washed clothes to dry". He too walked calmly across the water and returned the same way. The third monk watched the first two carefully in what he decided must be a test of his own abilities. "Is your learning so superior to mine? I, too, can match any feat you two can perform," he declared loudly and rushed to the water's edge to cross it. He promptly fell into the deep water. Undeterred, the wet monk climbed out of the water and tried again and again, but failed. The other two monks watched. After a while, the second monk turned to the first and said, "Do you think we should tell him where the stones are?"

ध्यान में भिक्षु

तीन भिक्षुओं ने ध्यान का अभ्यास करने का फैसला किया। वे एक झील के किनारे बैठे और एकाग्रता में अपनी आंखें बंद कर लीं। फिर, अचानक, पहला भिक्षु खड़ा हुआ और बोला, "मैं अपनी चटाई भूल गया"। वह पानी पर चढ़ गया और चमत्कारिक रूप से चलते हुए झील के पार दूसरी तरफ अपनी झोपड़ी में चला गया। जब वह लौट आया तब दूसरा भिक्षु खड़ा हुआ और कहा, "मैं अपने धोए गए कपड़े सूखने डालने के लिए भूल गया"। वह भी पानी के ऊपर शांति से चला और उसी तरह लौट आया। तीसरे भिक्षु ने पहले दो को सावधानी से देखा और फिर सोचा कि उसे अपनी क्षमताओं का परीक्षण करना चाहिए। "क्या तुम लोगों का सीखना मेरे से बेहतर है? तुम जो कर सकते हो वह मैं भी कर सकता हूं," उसने जोर से बोला और पार करने के लिए पानी के किनारे पर पहुंचा। वह त्रंत गहरे पानी में गिर गया। अडिग, गीला भिक्षु पानी से बाहर आया और पानी पर चलने की बार-बार कोशिश की, लेकिन असफल रहा। अन्य दो भिक्षुओं ने यह सब देखा। थोड़ी देर के बाद, दूसरा भिक्षु पहले से बोलता है, "क्या तुम्हें लगता है कि हमें उसे बताना चाहिए कि पत्थर कहाँ पर हैं?"

In the following question, a word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as in the two given matrices. The columns and rows of Matrix I are numbered from 0 to 4 and those of Matrix II from 5 to 9. A letter from these matrices can be represented first by its row and then the column number e.g. in the matrices for questions I to 4, M can be represented by 14, 21, etc; o can be represented by 20, 32, etc. Similarly you have to identify the correct set for the word given in the question.

Matrix I					Matrix II							
	0	1	2	3	4		5	6	7	8	9	
0	F	O	M	5	R	5	A	T	D	1	P	
1	S	R	F	0	M	6	I	P	A	T	D	
2	0	M	S	R	F	7	T	D	1	P	A	
3	R	F	0	M	S	8	P	A	T	D	1	
4	M	S	R	F	0	9	D	1	P	A	T

The power of concentration manifests as focused attention and as a one pointed mind. When you focus your mind on something, you conserve your energies and do not dissipate them on irrelevant thoughts. This is why, developing concentration is vital for anyone, who is aspiring to be more efficient in life.

Summer camps are supervised camps conducted to entertain as well as equip students with various life skills such as teamwork, socializing, decision making, independent and responsible living and more. It aids the overall development of a child and in addition to all these perks, children have fun during this process as they get to explore entirely new arenas and expand their reach. This is a widely accepted drill by the schools for the students. Here I would like to share my own experience with a summer camp in grade 6. Our school organized a little 3 day camp to a nearby hill station. Many of our regular teachers joined us along with hike counselors and tour guides who were extremely experienced in camping activities. We were given special instructions about discipline and behaviour which has to be maintained while at a high altitude place. We started the journey in a bus where we played team games to socialize with students from other classes. Upon reaching our destination, we were informed about various aspects of camping and about everything we should pay attention to it. It was a first multi-day trip without our parents for most of us. It was a challenge as we had to take care of ourselves and our belongings in the absence of our parents who usually complete most of these chores for us. This taught us about living independently and taking up responsibility. While on the campsite, all the students were divided into groups and were given various tasks such as helping to set up tents, gathering firewood and arranging food. These tasks gave us a chance to work in teams and know each other well. After the hard work, we were served delicious but simple food. Once done with the dinner, every student helped tirelessly to clean up the surrounding areas and wash the dishes. These things develop helpful nature in the kids and inculcate a fine habit of completing their work themselves. We were taken into the woods to hike and explore nature and its elements. There we were taught about the importance of various vegetation and we also learnt about the local wildlife. While hiking in the dense and endless woods we received a chance to explore the intricacy and wonders of nature. The entire camping experience holds an overwhelming amount of life skill to learn and apply. I feel extremely lucky to have got the chance to experience this time as it taught me values of life. Every parent should ensure that their child spends enough time in understanding and exploring nature rather than indulging in technology all the time. Nature teaches us the concept of simple living and provides serenity to our minds in our fast moving lives.
