The Koel

The Koel is one of our most familiar birds, its call being perhaps even better known than its appearance. It is about the size of the house crow, but is of slenderer build and has a longer tail. It frequents gardens, groves and open country in large numbers, especially large leafy trees. It lives entirely on trees and never descends to the ground. During winter the bird is silent but with the approach of the hot weather and its coincident breeding season, it becomes extremely noisy. All through that season its loud shrill, shrieking notes resound on the countryside throughout the day and far into the night. The call begins with a low ku-oo, but rises in scale with each successive ku-oo until at the seventh or eighth it reaches a feverish pitch and breaks off abruptly. The bird soon commences it all over again. Another common note is a sharp quick- repeated kik-kik-kik uttered by the female as she dashes from tree to tree or hops amongst the branches. Its food consists chiefly of banyan and peepal figs and berries of various kinds, but insects and caterpillars are also eaten. Its flight is swift and straight, and a koel fleeing before the vindictive onslaught of a pair of angry crows is a common sight.

The laying season is mainly from April to August and corresponds with that of its most usual host, the house crow. Its eggs are rather smaller, but very like the crows in appearance. As many as 11 have been found in a single crow's nest. The female Koel seizes the opportunity to deposit her egg in the crow's nest while the male deliberately draws the owners away by leading them on a chase.

कोयल

हमारे सबसे परिचित पक्षियों में से कोयल एक है, इसकी आवाज शायद इसकी उपस्थिति से भी बेहतर है। आकार में यह घर के कौवे के लगभग बराबर होती है, लेकिन इसका शरीर छरहरा है और इसकी पूंछ लंबी है। यह बगीचों, उपवनों और खुले स्थान पर, विशेष रूप से बड़े, पत्तेदार पेड़ों में अक्सर दिखाई दे जाती है। यह पूरी तरह से पेड़ों पर रहती है और जमीन पर कभी नहीं उतरती है। सर्दी के दौरान यह पक्षी शांत रहता है परंतु गर्म मौसम और संयोग से इसके प्रजनन के मौसम के पास आने से यह बेहद शोर करने लग जाती है। इस दौरान उस मौसम में इसकी जोरदार कर्णभेदी आवाजें, दिन भर और रात में ग्रामीण इलाकों में प्रतिध्वनित होती रहती हैं। इसकी आवाज निम्न कु-ओओ के साथ आरंभ होती है, परंतु प्रत्येक सातवीं या आठवीं कु-ओओ तक क्रमिक तबतक बढ़ती जाती है, जब तक कि यह उतेजना तक न पहुंचे जाए और अचानक बंद हो जाती है। पक्षी जल्दी ही इसे फिर से शुरू करता है। एक और सामान्य टिप्पणी मादा द्वारा तेज तेज दोहराई जाने वाली किक-किक-किक की आवाज है क्योंकि वह पेड से पेड या शाखाओं के बीच उड़ती रहती है। इसके भोजन में मुख्य रूप से बरगद और पीपल अंजीर और विभिन्न प्रकार के जामून शामिल होते हैं, परंत् इसके द्वारा कीड़े और कैटरपिलर भी खाए जाते हैं। यह तेज तथा सीधी उड़ान भरती है और नाराज कौवों की जोड़ी के विरोधाभासी हमले से पहले यह एक सामान्य दृश्य है।

अंडे देने का मौसम मुख्य रूप से अप्रैल से अगस्त तक होता है और इसका सबसे सामान्य मेजबान, घरेलू कौवा इसके साथ मेल खाता है। इसके अंडे कुछ छोटे होते हैं परंतु देखने में कौवे की तरह से होते है। एक कौवे के घोंसले में 11 से ज्यादा अंडे पाए जाते हैं। मादा कोयल अपने अंडे को कौवे के घोंसले में जमा करने का अवसर पा लेती है जबकि पुरुष कोयल जानबूझकर घोसले के मालिकों को पीछा करते हुए उन्हें दूर ले जाती है।

In the following question, two statements P and Q are given. You may look into their logical acceptability and mark your answer:

P: Some A's and some B's are C's. Some C's are both A's and B's.

Therefore some A's are B's.

Q : All A's are B's. Some C's are A's. Therefore some C's are B's.

Options:

- If both P and Q are true.
- If P is correct and Q is wrong or doubtful.
- If P is wrong or doubtful and Q is correct.
- If both P and Q are wrong or doubtful.

The following questions contain a small paragraph followed by a question on it. Read paragraph carefully and answer the question given below it:

It is up to our government and planners to devise ways and means for the mobilization of about ten crore workers whose families total up about forty crore men, women and children. Our agriculture is over-manned. A lesser number of agriculturists would mean more purchasing or spending power to every agriculturist. This will result in the shortage of man-power for many commodities to be produced for which there will be a new demand from a prosperous agrarian class. This shortage will be removed by surplus man-power released from agriculture as suggested above.

The above passage best supports which of the below statements?

Options:

Employment in production is more fruitful than employment in agriculture.

Indian economy is in a poor shape basically due to improper sector mobilization of man-power.

3. 🚜

A shift of labour from agricultural sector to the industrial sector would uplift the living standard.

4. *

The industrial sector is labour-deficient while the agricultural sector is over-manned in our country.

निम्नलिखित प्रश्नों में एक छोटा पैराग्राफ़ है और प्रश्न इसी पर आधारित है। पैराग्राफ को ध्यान से पढ़ें और नीचे दिए गए प्रश्न का उत्तर दे:

यह हमारी सरकार और योजनाकारों तक लगभग दस करोड़ श्रमिकों के संगठित करने के तरीकों और साधनों को तैयार करने के लिए है जिनमें लगभग 40 करोड़ पुरुष, महिलाओं और बच्चों का समूह है। हमारी कृषि पूरी तरह से श्रमिकों पर टिकी हुई है। कम से कम किसानों का मतलब है कि प्रत्येक किसान अधिक-से-अधिक खरीदारी करेगा या व्यय शक्ति बढ़ाएगा। इसके कारण कई वस्तुओं के उत्पादन के लिए श्रमिक संख्या में कमी आएगी जिससे ख़ुशहाल कृषक वर्ग की नई मांग होगी। उपरोक्त सुझाव के अनुसार कृषि को छोड़ने वाले अतिरिक्त लोगों की यह कमी खत्म हो जाएगी।

यह लेख किस कथन का सबसे अधिक समर्थन करता है? **Options:**

- कृषि रोजगार की तुलना में उत्पादन रोजगार ज़्यादा लाभदायी होता है।
- भारतीय अर्थट्यवस्था श्रमिकों के अनुचित क्षेत्र में जाने के कारण मूल रूप से खराब स्थिति में है।
- 🥃 🧸 कृषि क्षेत्र से औद्योगिक क्षेत्र में जाने पर श्रमिकों का जीवन स्तर बेहतर हो जाएगा।
- हमारे देश में औद्योगिक क्षेत्र में श्रमिकों की कमी है जबकि कृषि क्षेत्र में बहुत अधिक श्रमिक है।

Everywhere you go, people are talking about going green and how it impacts the planet. From plastic bags to chemical products, people are trying to come up with impactful ways that can help them adopt the practices for going green. Practically speaking, following all the environment friendly activities is simply a personal choice. No one can force individuals to contribute towards the betterment of this planet. But, being a part of this beautiful planet earth, you should definitely try to make this place a better place to live in. The future generations will simply love you for your efforts. A Native American proverb says that we do not inherit the earth from our ancestors. We borrow it from our children. Hence, it is an urgent need to keep the planet clean and green. Different studies and researches have concluded different benefits or reasons to go green. Some of the major ones are mentioned here. First of all, you should understand that you could significantly boost the overall value of your home just by making your home eco-friendly. By installing solar panels on the roof top or adding a water saving toilet, you will not only save money, but also create a perk for new buyers. Moreover, green homes use sustainable materials that have low impact on the environment. Also, your home is more durable, if you create an environment friendly home. Recycled products have the tendency to last over five times longer than the traditional materials. Hence, you will save more money on maintaining your home. Green homes have better indoor air quality, as paints and cleaners are low in volatile organic compounds, which make it comfortable for home owners to breathe. A green atmosphere is also important for reducing the harmful effects of pollution. As a result, your family and kids will be able to breathe fresh air and stay protected against any diseases or infections. Recycling further helps you to be more creative, as get the opportunity to create useful items out of recycled materials. You grow as a mature human being with Green choices, such as investing in everything that is energy or material efficient and buying less and used products. Using natural products make you a healthier person. When you will be healthy, you are going to be more productive at workplace. The less chemical products you use, the less toxins your family would breathe. This is why everything, right from household products to cosmetics are available in eco-friendly version. Going green is also effective in reducing your electricity bill. By switching to renewable energy sources, like solar panels, CFL and LED, you can save considerable amount of money every month on your electricity bill.
