Letter of Dr SJ Quasim to his grandchildren Moni and Baba Dearest Moni and Baba,

It is nearly six months now since I met you both in America, but back in India, hardly a day passes when I do not remember you. Your sweet talk and the questions you used to ask me are still fresh in my mind.

You might have forgotten, but I still remember you telling me about the hurricane which hit your city (Gulf Port in Mississipi) in 1997; the havoc and devastation it caused and the way you were all moved to a safe place, away from the coast. Then you asked me lots of questions about hurricanes. How are these caused? Why do they come to our area and not elsewhere? Can we make them change their direction? Is there anything we could do to stop them?

Hurricanes are generally formed in tropical oceans. They are known by different names in different regions of the world, such as 'typhoons' in the North Pacific, 'hurricanes' in the South Pacific and North Atlantic and 'cyclones' in the Indian ocean (Bay of Bengal and Arabian Sea). They are formed by the energy released from the sea which gets concentrated at one place in the atmosphere in the form of a coil or spiral. A full-sized hurricane is 100 to 150 km across, with winds of 120 kilometres per hour. The spiral is known as the core of very low pressure with an eye of 30-50 kilometres wide in the middle. The eye of the hurricane has perfectly calm weather, clear sky and no rain. Around the eye lies the core with winds of very high speed, thunder, lightning, torrential rain and heavy cloud. Within a hurricane, the energy keeps changing—either multiplying or dispersing or recharging and even 600 kilometres from the core, the wind speed can go up to 50-60 kilometres per hour. The average life span of a hurricane, from the time it is formed until it finishes, lasts for about 6 days. But this can vary, and some can go on with varying intensity for as long as two weeks.

I am afraid there is no technology known yet to change the route of the hurricane. The only thing we can do is to develop more and more accurate forecasts about where exactly the hurricane is likely to hit. Once this is known, we need a good system of evacuating the population to safer places. This is called 'hurricane preparedness plan.'

With lots of love,

From,

Abba

डॉ. एसजें कासिम का अपने पोते मोनी और बाबा को पत्र प्रिय मोनी और बाबा.

अब लगभग छह महीजे हो गए है जब मैं आप दोशों से अमेरिका में मिला था, लेकिल भारत नापस आने के बाद, शासद ही कभी ऐसा दिल गुजरा हो जब मुझे आपकी याद ल आई हो। आपकी प्यारी प्यारी बातें और प्रश्न जो आप मुझसे पूछते थे, वे अभी भी मेरे दिमाग में लाजा है। आप भूत गए होंगे, लेकिज मुझे अभी भी याद है कि जब आप उस तुफाल के बारे में मुझे बला रहे थे जो 1997 में आपके शहर (मिसिसिपी में खाड़ी बंदरगाह) से टकराया था; इसके कारण होते बाला बिलाश और विध्वंस और जिस तरह से आप सभी तट से दर एक सुरक्षित स्थान पर चले गए थे। तब आपने तुष्त्रामाँ के बारे में मुझसे बहुत सारे प्रश्न पूछे थे। ये कैसे आते हैं? वे हमारे क्षेत्र में क्यों आते हैं और कहीं और क्यों नहीं आते? क्या हम उनकी दिशा विभिन्न क्षेत्रों में अलग अलग जामों से जैसेकि उत्तरी प्रशांत में 'टाइफून', दक्षिण प्रशांत और उत्तरी अटलांटिक में 'तुफान' और भारतीय महासागर (बंगाल की खाड़ी और अरब सागर) में 'पक्रवात' जैसे नामों से जाना जाता है। ये समुद्र द्वारा छोड़ी गई ऊर्जा से उत्पन्न होते हैं जो एक कुंडल या सर्पिल आकार में वातावरण में एक रुधान पर केंद्रित हो जाता है। 120 किलोमीटर प्रति घंटे की हवाओं के साथ एक पूर्ण आकार का तूफान 100 से 150 किमी में फैल जाता है। सर्पिल को मध्य से 30-50 किलोमीटर चीड़े दायरे के साध बहुत कम दबाव के कोर के रूप में जाना जाता है। तुफान का सक्ष्य पूरी तरह से शांत मौसम, स्पष्ट आकाश और वारिश नहीं होता है। लक्ष्य के चारों और बहुत तेज गति, गरज, विज्ञती, मूसलाधार वारिश और भारी वादल की हवाओं के साथ कोर मूल में निहित होता है। एक तुषान के अंदर, ऊर्जा बदलती रहती है - वा तो गुणा होती रहती है या फिलरती रहती है या रिचार्ज होती रहती है और यह कोर से 600 किलो मीटर तक, हवा की गति 50 -60 किलो मीटर प्रति घंटे तक से जा सकती है। तुष्पन का औसत जीवन काल, इसके बनने से खत्म होने तक, लगभग 6 दिनों तक रहता है। लेकिन यह भिन्न भी हो सकता है और कई बार दो सप्ताह तक के लिए अलग - अलग तीवता के साथ आगे वढ सकता है। मैं चितित हूं कि तुफान के मार्ग को बदलने के लिए अभी लक कोई तकनीक नहीं हैं। एकमात्र चीज जो हम कर सकते हैं वह है कि तुफात के टकराने की संभावता के बारे में अधिकतम सटीक पूर्वानुमान विकसित करना। एक बार इसका पता लग जाने के बाद, हमें जनता को सुरक्षित स्थानी पर से जाने के लिए एक अच्छी प्रणाली की आवश्यकता है। इसे 'तुष्तान तैयारी योजना' कहा जाता

बहुत प्यार के साध, आपका,

Meet

In the following question, a word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as in the two given matrices. The columns and rows of Matrix I are numbered from 0 to 4 and those of Matrix II from 5 to 9. A letter from these matrices can be represented first by its row and then the column number e.g. in the matrices for questions 1 to 4, M can be represented by 14, 21, etc; o can be represented by 20, 32, etc. Similarly you have to identify the correct set for the word given in the question.

Matrix I	Matrix II	
01234	5 6 7 8 9	
0 FOMS R	5 A T D I P	
1 SR F OM	6 I P A T D	
2 OMSRF	7 T D I P A	
3 RFOM S	8 P A T D I	
4 MSRF O	9 D I P A T

In the question given below, there are two statements labelled as Assertion (A) and Reason (R).

Mark your answer as per the codes provided below:

Assertion (A): The Darwinian theory of natural selection sometimes referred to as 'the survival of the fittest' explains the origin of many species as a normal process of descent from parent forms.

Reason (R): The contemporary distribution pattern of many organisms is often the result of natural migration or dispersal from original center(s) of development.

Options:

- Both A and R are true and R is the correct explanation of A
- Both A and R are true but R is not a correct explanation of A
- A is true but R is false
- 4 * A is false but R is true

Playing sports is a favorite activity for many people around the world. It provides us with enjoyment and also freshens up our mind. However, playing sports is actually more than running, jumping or kicking a ball on the field. Indulging in sports helps our body function smoothly and in a more efficient manner. Sports involve the activity of each and every muscle in our body. This strengthens as well as promotes good health. So, one should definitely play sports and understand the major health benefits associated with it. It gives you a healthy heart, as playing sports helps with stretching ability. Out of all the body organs in a human body, it is the heart that benefits the most from playing sports and there are fewer chances of malfunctioning of your heart. When you play, your heart pumps more blood, as it is a type of workout for the body. It also helps in diabetes control because it helps the insulin perform in a better manner. As a result, diabetics make most of the insulin present in their body. Also, physical activity helps in reducing the risk of type 2 diabetes. It can also assist in weight management, as it burns excess calories. Obesity is a big issue faced by millions of people across the world. However, this issue can be dealt with indulging in loads of sports or similar physical activities. Fat gets burnt and calories are shed through the rigorous physical activities involved in sports. People, who regularly play sports, are naturally leaner and fitter. Another benefit of sports can be seen in terms of lower hypertension. With higher level of hypertension or high blood pressure, one can become the prey to stroke or heart disease. This makes controlling hypertension absolutely necessary. Hence, being physically active is very important. Playing sports also helps in balancing or maintaining lower cholesterol levels. Some experiments showed that LDL or bad cholesterol levels in sedentary people were much higher, while HDL or good cholesterol levels were significantly higher in athletes. Sports also bring a positive attitude to your life, if played in a healthy manner. It refreshes the mind and helps in developing a fresh outlook towards life. Be it any sport, just being involved in physical activities will help you build self-esteem. When one improves in any particular sport or skill, one feels good about it. Discipline also becomes a natural part of life, when you start spending time in playing sports. This is because sports inspire people to live life by certain rules and regulations and move towards a positive end. Children, who indulge in sports feel healthier, and develop better and healthier relationships with other people. Such children have a positive and team based outlook instilled in them.
