Read the following passage and answer the questions given after

One day I saw a small snake in the compound, crawling along slowly. Seeing me it moved away quickly and hid itself in a coconut shell. I quietly went and closed the mouth of the coconut shell with a stone. Then I took the shell and ran to Grandmother.

"Look, Grandma," I cried, "I have caught a snake."

"Snake?" asked grandmother in alarm. She was shocked. She cried for help. Grandfather came running, snatched the shell and threw it away.

The snake crawled away and disappeared behind some bushes. Grandfather warned me never to go near a snake, because snakes were very dangerous.

Later in the evening I tried to catch a bee, which stung me on my finger. I felt a sharp pain. I ran to grandmother and told her that I had been bitten and wanted her to do something to stop the pain. Grandmother thought that I had been bitten by a snake. She called out to Grandfather, "Come and see what has happened to Raja."

Grandfather looked at my finger and there was a blue mark. He immediately took me in his arms, and ran across the garden and through the paddy fields reached a small house quite far away from our home. He shouted for the man who lived there.

An old grey haired man came out. He knew the cure for snakebite. The old man took me inside. He looked at my finger and then asked me to sit still. He then took some water in a brass vessel and started reciting some mantras.

I wanted to say that it was a bee, not a snake that had bitten me, but they didn't allow me to speak. By this time the pain had stopped. "Thank God, you brought Raja in time. He is out of danger now. It was indeed a poisonous snake," said the man. "Grandfather thanked him for the magic cure."

Question Label: Comprehension

दिये गए पाठ्यांश को पढ़ें और इस पर आधारित प्रश्नों के उत्तर दें।

एक दिन मैंने परिसर में एक छोटा सा साँप देखा था, जो धीरे-धीरे रेंग रहा था। मुझे देखकर वह जल्दी से एक नारियल के खोल में छिप गया था। मैं चुपचाप गया और एक पत्थर से नारियल के खोल के मुंह को बंद कर दिया। उसके बाद मैं खोल को दादी के पास ले गया।

"देखो, दादी," मैं चिल्लाया, "मैंने एक साँप पकड़ लिया है।"

"सॉप?" दादी ने चौंककर पूछा। वह हैरान थी और सहायता के तिए बाकियों को बुलाने लगी। दादाजी भागते हुए आये और खोल छीनकर दूर फैंक दिया।

साँप रेंगकर चलने लगा और कुछ झाड़ियों के पीछे गायब हो गया। दादाजी ने मुझे साँप के पास कभी न जाने की चेतावनी दी, क्योंकि साँप बहुत ही खतरनाक होते हैं।

बाद में शाम को मैंने एक मधुमक्खी को पकड़ने की कोशिश की और उसने मुझे मेरी उंगली पर डंक मार दिया। मुझे बहुत तेज दर्द हुआ। मैं भागकर दादीजी के पास गया और उनसे कहा कि मुझे काट लिया गया है और दर्द को रोकने के लिए कुछ कीजिए। दादीजी ने सोचा कि मुझे एक साँप ने काट लिया है। उन्होंने दादाजी को बुलाया, "आओ और देखो राजा को क्या हुआ है।"

दादाजी ने मेरी उंगली को देखा और उस पर एक नीले रंग का निशान था। उन्होंने तुरंत ही मुझे अपनी बाहों में उठा लिया और उद्यान के पीछे, धान के खेतों से होकर हमारे घर से काफी दूर एक छोटे से घर में ले गये। उन्होंने उस घर में रहने बाले आदमी को बुलाया।

एक बूड़ा भूरे रंग के बालों वाला आदमी बाहर आया। वह साँप के काटे का इलाज जानता था। उस बूढ़े आदमी ने मुझे देखा। फिर मेरी उँगली को देखा और मुझे स्थिर बैठने को कहा। फिर उसने एक पीतल के बर्तन में थोड़ा सा पानी लिया, और कुछ मंत्रों का उच्चारण शुरू कर दिया।

मैं बताना चाहता था कि वह एक मधुमक्खी थी, न कि साँप जिसने मुझे काटा था, लेकिन उन्होने मुझे बोलने ही नहीं दिया। इतनी देर में दर्द होना भी वंद हो गया था। "भगवान का शुक्र है, कि आप राजा को समय पर यहाँ ले आये। अब वह खतरे से बाहर है। वह कोई जहरीला साँप रहा होगा।" उस आदमी ने कहा। "दादाजी ने उन्हें उनके जादूई इलाज के लिए धन्यवाद कहा।" Question Number: 53 Question Id: 973597888 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes

Scientists all over the world are trying to fight diseases, and they have certainly succeeded to a large extent. But, a recent discovery shows that AIDS has created a terrible scare in the world. The reports suggest that after taking a toll of several thousand lives in America and Europe, this disease has entered India in mild forms. It might soon appear in a big way, spelling doom and disaster. The Government of India has even launched a big offensive against the terrible disease. Although, there is no reason for immediate alarm, yet the public is being educated about the symptoms, causes, remedies, precautions and other details related to this syndrome. The entire media, including radio, television, newspapers, and periodicals are sounding a note of warning and asking the people to take all precautions to save themselves from this killer disease. It is also recommended to include AIDS education programme in the high school curriculum. This disease is basically an illness, in which the natural system of the body starts failing by slow degrees. A human body is known to be equipped with various weapons of its own, in order to be protected against invaders, like germs. One, who is suffering from AIDS loses these weapons and becomes unable to fight with it. Further, this disease infects the white cells of the body and is often very difficult to diagnose. Early symptoms of this disease are a significant loss of weight, swollen glands, fever and night sweats, extreme lethargy and oral or esophageal infection. However, these symptoms do not always mean the presence of AIDS. It generally attacks people who are used to changing their sexual partners, for example, bisexuals, homosexuals and prostitutes. Other victims include the drug addicts and people who receive frequent blood transfusions. Hence, doctors recommend taking precautions and studying about the disease in detail. It can be transferred through infection needles, blood, semen, saliva, urine and stools. In developed forms, it proves fatal as there is no cure for it. In order to avoid being attacked by AIDS, one should have regular medical examination and should not be repeatedly exposed to sexually transmitted diseases. One should also avoid sharing the needles, razors and tooth brushes with others. A woman who carries AIDS should not conceive, as the disease gets passed on to the child. In simple words, this syndrome is a potential health threat to mankind. The only way to deal with it is to face it calmly and boldly. There is no need for scare or nervousness. The Government takes several initiatives to spread awareness regarding this disease, both in urban and rural areas. India is lucky to have been saved from this terrible disease so far.
