Spikes and Stripes

Most animals need to protect themselves from the attack of predators -- other animals which would kill and eat them -- and hence have gradually developed systems of self and group defence. In the war against enemies, animal weaponry ranges from spikes, claws, shells, horns, bony plates to poisonous chemicals that kill, cause burns or irritations. Tricks and mimicry also are used to confuse the enemy and send it away.

Colours and patterns on an animal's coat are also an important means of self defence in the animal kingdom and are used to warn rivals and frighten an enemy or to hide. The use of colour and body pattern -- dots, stripes, spots, etc. help the animal blend with the background and thus, escape notice when the hunter is around. This is called camouflage.

Camouflage is also used by the hunter to hide its presence while quietly walking behind its prey. Lines and dots help tigers and leopards to hide themselves while hunting.

Some animals also change colour to blend with the background. The chameleon, for instance, turns red, yellow, black or multi-coloured. Some octopuses can make their skin bumpy to match a similar background.

Several animals have developed defence systems using poisonous stings, sprays and bites to injure or kill an enemy. Snakes, scorpions, wasps, jellyfish and stingrays are poisonous.

Most animals defend themselves by escaping from the enemy. The strategies used are to freeze, pretending to be dead, flee or finally fight. As the eyes of the predator can detect the slightest movement, the hare remains motionless in self-defence. This 'statue' game is also played by the tree squirrel.

A number of animals fool their enemies by pretending to be an unpalatable dish which few fancy eating because of their bad taste. And some creatures -- the stick and leaf insects and the flower mantis save themselves from predators because their bodies are shaped like a twig, leaf or flower. A number of animals also make themselves look bigger and fiercer. The Austrian frill-lizard, frightens its enemies by suddenly spreading out its neck frill and opening its mouth wide.

स्पाइक और स्ट्राइप

अधिकांश जानवरों को शिकारियों -- अन्य जानवरों के हमले से स्वयं को बचाने की आवश्यकता पड़ती है, जो उन्हें मारकर खा जाते हैं -- और इसलिए इन जानवरों ने धीरे-धीरे स्वयं के और समूह की रक्षा के लिए तरीका विकसित किया है। दुश्मनों से युद्ध में, पशु कई तरह के हथियार जैसे कि कील (स्पाइक्स), पंजे, गोले, सींग, हड्डी की प्लेटों से लेकर जहरीले रसायनों तक, इस्तेमाल करता है जो उन्हें मार देते हैं, जला देते हैं या परेशान करते हैं। चालाकी और नकल का उपयोग भी दुश्मन को भ्रमित करने और इसे दूर भेजने के लिए किया जाता है।

जानवरों के शरीर पर रंग और पैटर्न भी पशु जगत में आत्मरक्षा का एक महत्वपूर्ण माध्यम हैं और इसका उपयोग प्रतिद्वंद्वियों को चेतावनी देने और दुश्मन को डराने या छिपने के लिए किया जाता है। रंग और शरीर के पैटर्न -- डॉट्स, स्ट्राइप, धब्बे आदि का उपयोग जानवरों को पृष्ठभूमि के साथ मिश्रण में मदद करते हैं और इस प्रकार शिकारी के आसपास होने पर उससे बचकर भागने की सूचना मिल जाती है। इसे छलावरण कहा जाता है।

चुपचाप शिकार के पीछे चलते हुए शिकारी द्वारा भी छलावरण का उपयोग उपस्थिति को छिपाने के लिए किया जाता है। बाघ और तेंदूए के शरीर पर मौजूद लाइन और डॉट्स उन्हें शिकार के समय खुद को छिपाने में सहायक होते हैं।

कुछ जानवर पृष्ठभूमि के साथ मेल खाने के लिए भी रंग बदलते हैं। उदाहरण के लिए, गिरगिट लाल, पीला, काला या बहु रंग में बदल जाता है। कुछ ऑक्टोपस एक समान पृष्ठभूमि से मेल खाने के लिए अपनी त्वचा को ऊबड़ खाबड़ बना सकते हैं।

कई जानवर अपने दुश्मन को नुकसान पहुँचाने के लिए जहरीले स्टिंग, स्प्रे और दंश के उपयोग से रक्षा प्रणालियों को विकसित करते हैं। सांप, बिच्छू, हड्डे, जेलीफिश और स्टिंगरे जहरीले होते हैं।

अधिकांश जानवर भागकर स्वयं को दुश्मन से बचाते हैं। इस्तेमाल की जाने वाली रणनीतियों में स्थिर रहना, मृत होने का नाटक करना, भागना या आखिरकार लड़ना शामिल है। जैसे ही शिकारी को थोड़ी सी भी हलचल का पता चलता है, खरहा स्वयं की सुरक्षा के लिए गतिहीन हो जाता है। यह 'मूर्ति' खेल वृक्ष पर रहने वाली गिलहरी द्वारा भी खेला जाता है।

कई जानवर अरुचिकर पकवान बनाने का नाटक करके अपने दुश्मन को मूर्ख बनाते हैं, ये व्यंजन दिखने में सुंदर होते हैं लेकिन उनका स्वाद खराब होता है। और कुछ प्राणी -- टहनी और पत्तों में रहनेवाले कीड़े तथा फ्लावर मेंटिस खुद को शिकारियों से बचाते हैं क्योंकि उनके शरीर का आकार टहनी, पत्ती या फूल की तरह होता है। कई जानवर खुद को बड़ा और डरावना दिखाते हैं। ऑस्ट्रियाई फ्रिल-लिजार्ड, अचानक अपने गर्दन के फ्रिल को फैलाकर और अपने मुंह को चौड़ा खोलकर अपने दुश्मनों को डराते हैं।

Traveling has the power to transform your life and shift the way you think about yourself and the world. Here are just some of the ways adventuring the world can alter your mindset. It is life changing. Traveling has the power to change your life in many ways. First, when you use those vacation days for travel you are basically giving yourself new experiences and extending your comfort zone. Stepping outside of your comfort zone is something we talk about a lot because it is an important tool that makes you grow as an individual. It introduces you to those things that are holding you back. Once you let those barriers down by doing something that scares you or makes you feel uncomfortable, you are letting yourself develop into a more experienced version of yourself. It improves your mood. As soon as you step off the plane you are instantly excited and happy. You have left all your worries behind and become present in the moment as you move towards the freshness of your new environment. Removing the stress from your life completely changes your mood and to do that, you usually have to do something that removes you from the stress. Change your mood setting to a carefree one that will enhance your heart and your happiness. It recharges you. To be very honest, sometimes the money is not worth it. Those vacation days are mental health days. Your brain needs a break from the constant work and your body needs a break from sitting at a desk. Your eyes need a break from staring at a computer screen. Go to the beach and enjoy the vitamin D. Let the salt water soak your skin and let the sand cover your body while you recharge. Reset your emotions and connect with yourself and allow your body to recharge. It gives you a new perspective. The favorite part of traveling is that it gives you a new perspective. It provides a new way to recognize life, who you are and how you spend your time. When you travel, you meet new people and experience new things. You embark on all sorts of adventures and even redefine your meaning of life. Because you are learning and gaining information from new places and people. Travel can also shape you into a better and more well rounded person. There is so much to see and do in this world. It is good to explore a new place and gain a new perspective, even if it is just traveling to another state or taking a road trip. It changes you for the better. Traveling changes who you are as a person for all the reasons stated above. It is something that you do not realize is needed until you do it. It brings out a different side of who you are as an individual. Take advantage of the opportunities you have. It is so easy to travel these days and I promise you, it would not be something you regret.
