# Read the following passage and answer the questions based on it.

An important aspect of socializing is 'small talk' – informal conversation about things that are not important but establish your goodwill towards the other person and allow you to get to know him/her better. Small talk happens all the time between casual acquaintances, people travelling together and people you meet in the course of your work etc.

The difference between socializing and chatting with your friends is that you have known your friends for a long time, and can be open with them, while small talk is made with people you may not know. Therefore, while socializing you have to be careful about the topics you discuss. Avoid subjects that can give offence and do not ask probing personal questions about age, salary, or marital status.

Normally the conversation is about the weather, hotels, meals, entertainment, the news of the day etc. Very often the topics flow from the conversational contacts. The answers to questions and the comments that follow can provide a lead to the next topic. When someone makes small talk with you, do not give only monosyllabic Yes or No answers. Add an opinion or ask for the other person's opinion or feeling.

Another important aspect of small talk is the timing, how long one should carry on with it. The simple answer is not too long, particularly in a formal or business situation. One should not wait for the guest to signal that it is time for work or move on by looking at the watch or clipping open the file or brief case.

enquire about the other person's personal life

नीचे दिये गए पाठ्यांश को पढ़ें और इसके बाद दिये गए प्रश्नों के उत्तर दें।

सामाजिक होने का एक महत्वपूर्ण पहलू है 'संक्षिप्त वार्ता' - ऐसी चीजों के बारे में अनौपचारिक बातचीत जो महत्वपूर्ण नहीं है, लेकिन दूसरे व्यक्ति के प्रति आपकी सद्भावना को स्थापित करती हैं, तथा उसे बेहतर ढंग से जानने में आपकी मदद करती हैं। संक्षिप्त वार्ता हर समय आकस्मिक परिचितों, एकसाथ यात्रा कर रहे लोगों तथा अपने काम आदि के दौरान मिलने वाले लोगों के साथ होती है।

सामाजिक होने और अपने दोस्तों के साथ बातचीत करने में अंतर यह है कि आप अपने दोस्तों को लंबे समय से जानते हैं, और उनके साथ खुलकर बात कर सकते हैं, जबिक संक्षिप्त बातचीत उन लोगों के साथ होती है जिन्हें हो सकता है आप जानते न हों। अतः सामाजिक होते समय आपको चर्चा किए जाने वाले विषयों को लेकर सावधान रहना चाहिए। ऐसे विषयों से बचें जो नाराज कर सकते हैं और उम, वेतन या वैवाहिक स्थिति जैसे टयक्तिगत प्रश्न न पूछें।

सामान्यत: बातचीत मौसम, होटल्स, भोजन, मनोरंजन, दिन की खबर आदि के बारे में होती है। यदा-कदा बातचीत वाले संपर्कों से विषय आ जाते हैं। प्रश्नों के उत्तर और उन पर होने वाले कमेंट्स अगले विषय के लिए राह बना सकते हैं। जब कोई ट्यक्ति आपसे संक्षिप्त वार्ता करता है तो केवल हां या ना में उत्तर न दें। अपनी राय दें या दूसरे ट्यक्ति की राय या अनुभव जानें।

संक्षिप्त वार्ता का एक अन्य महत्वपूर्ण पहलू है समय, कोई ट्यक्ति कितना समय बात कर सकता है। सीधा सा जवाब है ज्यादा लंबे समय तक नहीं, विशेष तौर पर औपचारिक या ट्यापार की स्थिति में। ट्यक्ति को मेहमान के संकेत की प्रतीक्षा नहीं करनी चाहिए कि यह काम का समय है या घड़ी देखते हुए या फ़ाइल या ब्रीफकेस की क्लिप खोलते हुए चलने का समय है।

Everyone mind wanders but Mindfulness is paying attention to what is happening in the present moment. So if you are aware that your mind is wandering then you are halfway to a successful mindfulness practice. The other half of mindfulness is gently returning your attention back to the here and now. But this does not mean you have to yank your misbehaving mind back to reality. Instead, think of it as a compassionate return to consciousness. Picture a feather on the ground is lifted up by a gust of wind and then floating back down to rest on the pavement. Wandering, awareness and return requires practicing a minute of mindfulness no matter where you are. The easiest tool for achieving that gentle return to the present moment is always available to you. Focus on one single physical sensation. It could be feeling your back against the chair, your hand holding the fork or your finger on the touch screen. The key is to aim all of your awareness directly at one physical sensation of your choice. Pick one part of your body that is in contact with an object. Say it is your feet on the floor. Pour all of your awareness right down into the soles of your feet. Observe the sensation of your feet resting on the floor lightly. Now wiggle your toes a bit and notice how the sensation changes. If you are wearing socks then try to feel the fabric against your feet. This is about noticing, rather than making a relative comparison to anything that you are not experiencing right now. All we are focusing on is the feeling and it took only a minute. I know this might all seem ridiculously simple as it is. It is the mind that complicates things when it takes us out of the here and now. So making the choice to pay attention to how you are feeling in the moment is a crucial step to actually being in the moment which will increase productivity and focus. It will also make you happier. In a study published in the journal Science by Harvard researchers found that people spend nearly half their waking hours thinking about something other than what they are doing at that moment. This distraction from the task at hand typically makes them unhappy. When we are fully present we are better communicators. We are less reactive and more responsive to the people around us at home and at work. We are also more fully here for ourselves since we are in better touch with how we feel and what we need. We begin to feel more in control in a world where so much is out of our control.
