Read the passage given below and answer the questions that follow by marking the most appropriate option out of the four given after each question.

Way back in the seventh century, a ship full of refugees from Iran reached the shores of South Gujarat. The Suryavanshi king of Sanjaan sent his men with supplies to meet the visitors. He also sent a jug of milk, filled to the brim, as a signal to the new arrivals. The king wanted to make it clear that just as the jug was brimming over and could not hold anything more in it, the land also could not have more people. Visitors were welcome, settlers were not.

But the refugees were not that easy to shoo away. Their reply was in symbols too. They added some sugar to the milk for the king's men to take back. Theirs was also a clear message: just as sugar dissolves in milk the new arrivals would become a part of the people. The king accepted them, and the Parsis have been a part of Indian life ever since.

The journey from Iran to Gujarat had not been easy. The ship almost went down in terrible storm and only the fervent prayers of the homeless tribe seemed to keep it going. The Parsis were Zoroastrians, worshippers of fire, and promised Lord Zarathustra that they would set up a fire temple - Atash Behram if they reached the shore safely. And when they did settle down in Gujarat, they kept their promise, though it took several centuries.

According to the legend, dastoors, the learned Parsi priests, brought fire down from Nauma Aasman - the ninth sky. But before they could set up a temple there were devastating wars. The Parsis bravely defended Sanjaan from invaders. However, they had to move towards the east, shifting from place to place. After 375 years a major branch of Parsis settled down in Untwada where they constructed the fire temple.

Then the fire that was brought down from the ninth heaven to Sanjaan was established in the fire temple, in 1742. Many centuries had passed by but the fire from the seventh century has not lost its flame. The same fire lights up the fire temple even today, 14 centuries after its arrival on the earth.

नीचे दिये गये लेख को पढ़ें और उसके बाद दिये गये प्रश्नों के उत्तर प्रत्येक प्रश्न के बाद दिये गये चार विकल्पों में से सबसे उपयुक्त विकल्प को चिहिनत करके दें।

बहुत समय पहले सातवीं शताब्दी में, ईरान से शरणार्थियों से भरा जहाज दक्षिण गुजरात के तट पर पहुंचा था। संजान के सूर्यवंशी राजा ने अपने खाद्य वस्तुओं व अन्य सामान के साथ आगंतुकों से मिलने के लिए अपना एक दल भेजा था। उन्होंने नए आगंतुकों के लिए एक संकेत के रूप में, किनारे तक भरा दूध का एक जग भी भेजा था। राजा यह स्पष्ट करना चाहता था कि जैसे जग पूरा किनारे तक भरा हुआ और उसमें कुछ भी अन्य चीज़ नहीं रखी जा सकती, इसी प्रकार इस भूमि पर भी अधिक लोग नहीं रह सकते। आगंतुकों का स्वागत है, उपनिवेशियों का नहीं।

लेकिन शरणार्थियों को वापस भेजना इतना आसान नहीं था। उनका उत्तर भी इशारों में था। उन्होंने दूध में कुछ चीनी मिला दी और राजा के लोगों के पास वापस दे दिया। उनका भी एक स्पष्ट संदेश था: जैसे चीनी दूध में घुल जाती है, वैसे ही नए आगंतुक भी स्थानीय लोगों का हिस्सा बन जाएंगे। राजा ने उन्हें स्वीकार कर लिया, और तब से पारसी भारतीय जीवन का एक हिस्सा बन गये हैं।

ईरान से गुजरात की यात्रा आसान नहीं थी। जहाज भयंकर तूफानों में फंस गया था और बेघर लोगों की प्रार्थनाओं ने ही इसे बचाये रखा। पारसी ज़रथुष्ट्री धर्म के थे, अग्नि के उपासक और भगवान जारथस्ट्ररा को वचन दिया था कि यदि वे किनारे पर सुरक्षित रूप से पहुंच जाते हैं, तो वे एक अग्नि मंदिर -आतिश बेहराम स्थापित करेंगे और जब वे गुजरात में बस गए, उन्होंने अपना वचन पूरा किया, हालांकि इसमें कई शताब्दियां लगी।

पौराणिक कथाओं के अनुसार, दस्तूरों, विद्वान पारसी पुजारियों ने नौमा आसमान - नवां आकाश से अग्नि लायी थी। लेकिन इससे पहले कि वे मंदिर स्थापित कर सकें, वहां विनाशकारी युद्ध हुए। पारसियों ने आक्रमणकारियों से संजान का बचाव बहुत बहादुरी से किया। हालांकि, उन्हें पूर्व की तरफ जाना पड़ा और एक स्थान से दूसरे स्थान पर विस्थापित होते रहे। 375 वर्षों के बाद पारसियों का एक प्रमुख दल उंटवाड़ा में बस गया, जहां उन्होंने अग्नि मंदिर का निर्माण किया।

उसके बाद, नौवें स्वर्ग से संज्ञान तक लायी गयी अग्नि को अग्नि मंदिर में 1742 में स्थापित किया गया था। उसके बाद कई सदिया समाप्त हो गयी हैं लेकिन सातवीं शताब्दी से लगायी गयी आग की लों अभी तक नहीं बुझी है। पृथ्वी पर पहुंचने के 14 शताब्दियों बाद आज भी उस मंदिर की ज्वाला उसी आग से रोशनी प्रदान कर रही है। Question Number: 53 Question Id: 2062051318 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes

The Big Bang theory is an effort to explain what happened at the very beginning of our universe. Discoveries in astronomy and physics have shown beyond a reasonable doubt that our universe did in fact have a beginning. Prior to that moment there was nothing, during and after that moment there was something our universe. The big bang theory is an effort to explain what happened during and after that moment. According to the standard theory, our universe sprang into existence as singularity around 13.7 billion years ago. Singularities are zones which defy our current understanding of physics. They are thought to exist at the core of black holes. Black holes are areas of intense gravitational pressure. The pressure is thought to be so intense that finite matter is actually squished into infinite density. These zones of infinite density are called singularities. Our universe is thought to have begun as an infinitesimally small, infinitely hot, and infinitely dense. After its initial appearance, it apparently inflated, expanded and cooled, going from very, very small and very, very hot, to the size and temperature of our current universe. It continues to expand and cool to this day and we are inside of it incredible creatures living on a unique planet, circling a beautiful star clustered together with several hundred billion other stars in a galaxy soaring through the cosmos, all of which is inside of an expanding universe that began as an infinitesimal singularity which appeared out of nowhere for reasons unknown. This is the Big Bang theory. There are many misconceptions surrounding the Big Bang theory. As in, we tend to imagine a giant explosion. Experts however say that there was no explosion, there was an expansion which continues even today. Rather than imagining a balloon popping and releasing its contents, imagine a balloon expanding: an infinitesimally small balloon expanding to the size of our current universe. Another misconception is that we tend to image the singularity as a little fireball appearing somewhere in space. According to the many experts however, space did not exist prior to the Big Bang. Back in the late 60s and early 70s, when men first walked upon the moon, three British astrophysicists, Steven Hawking, George Ellis, and Roger Penrose turned their attention to the Theory of Relativity and its implications regarding our notions of time. In 1968 and 1970, they published papers in which they extended Einsteins Theory of General Relativity to include measurements of time and space. According to their calculations, time and space had a finite beginning that corresponded to the origin of matter and energy. The singularity did not appear in space; rather, space began inside of the singularity. Prior to the singularity, nothing existed.
