Read the passage given below and answer the questions that follow by marking the most appropriate option out of the four given after each question.

Plant trees to save the earth.

Trees are the lungs of mother earth.

Trees are green gold.

We often come across such slogans. However, little do we know that trees and shrubs not only purify the air but also reduce noise pollution.

The planting of popular trees, like casuarinas, tamarind, banyan and neem, appears to provide a possible way of reducing noise pollution in towns. According to a study by a team of doctors and technicians at the Institute of Oto-Reino-Laryngology in Madras Medical College, these trees and certain other shrubs strongly reduce sound levels, particularly the din produced by the continuous bustle of automobiles.

As part of a project of the Science and Technology Department of the Central Government, the Institute conducted investigations into the effect of noise pollution on workers in four cities of Tamil Nadu and Kerala. It was found that the exposure of these persons to traffic noise resulted in a considerable loss of hearing capacity over a period of time. The study of trees and shrubs being able to reduce noise was an offshoot of this project.

Trees and shrubs appear to act as good noise prevention screens, even though they cannot eliminate the noise completely. The green leaves actively absorb noise and the reduction may also be due to the physical blocking of sound waves by the stem and the bark. Perhaps it is because of this capacity that neem trees were traditionally planted in front yards of residences, tamarind trees on roadsides and banyan trees in temples.

Sub questions

Correct: 1 Wrong: 0 As part of a project of the Central Government, investigations into the effect of noise pollution were conducted on: **Options:** 1 * Students 2. * Children 4 * Old people Question Number: 54 Question Id: 206205481 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Correct: 1 Wrong: 0 According to the facts given in the passage, what is the effect of noise pollution? **Options:** 1. नीचे दिये गये गद्यांश को पढ़ें और उसके बाद दिये गये प्रश्नों के उत्तर प्रत्येक प्रश्न के बाद दिये गये चार विकल्पों में से सबसे उपयुक्त विकल्प को चिहिनत करके दें।

> पृथ्वी को बचाने के लिए पेड़ लगायें। पेड़ धरती मां के फेफड़े हैं। पेड़ हरा सोना हैं।

हम अक्सर इस प्रकार के नारे देखते हैं। हालांकि, बहुत ही कम लोग यह जानते हैं कि वृक्ष और झाड़ियां केवल हवा को ही शुद्ध नहीं करते हैं बल्कि ध्वनि प्रदूषण को भी कम करते हैं।

लोकप्रिय वृक्षों, जैसे कौसारीनास, इमली, बरगद और नीम, का रोपण शहरों में ध्विन प्रदूषण को कम करने का एक संभावित वैकल्पिक स्रोत है। मद्रास मेडिकल कॉलेज के ओटो-रेनो-लैरिन्गोलॉजी संस्थान में डॉक्टरों और तकनीशियनों की टीम के अध्ययन के अनुसार, ये वृक्ष और अन्य कुछ विशेष झाड़ियां ध्विन स्तरों, विशेषरूप से ऑटोमोबाइल के निरंतर हलचल द्वारा उत्पन्न डिन को कम करते हैं।

केंद्र सरकार के विज्ञान और प्रौद्योगिकी विभाग की एक परियोजना के हिस्से के रूप में, संस्थान ने तमिलनाडु और केरल के चार शहरों में श्रमिकों पर प्रदूषण के प्रभाव में जांच की है। यह पाया गया कि इन ट्यक्तियों में ट्रैफिक के शोर से लंबे समय तक संपर्क में रहने पर सुनने की क्षमता में बहुत कमी आई है। ध्वनि को कम करने में पेड़ों और झाड़ियों की क्षमता का अध्ययन इस परियोजना का एक मुख्य भाग था।

यह पाया गया कि वृक्ष और झाड़ियां ध्विन प्रदूषण के निवारण का कार्य करने के लिए एक अच्छे स्रोत हैं, भले ही वे ध्विन पूरी तरह से समाप्त नहीं कर सकते। हरी पित्तयां सिक्रिय रूप से ध्विन को अवशोषित करती हैं और ध्विन में कमी तने और छाल द्वारा ध्विन तरंगों के भौतिक अवरोधन के कारण भी हो सकती है। शायद इस क्षमता के कारण ही नीम के वृक्षों को पारंपरिक रूप से घरों के सामने की खाली जगहों, इमली के वृक्षों को सड़कों पर और वरगद के वृक्षों को मंदिरों में लगाया जाता था।

The Information Technology & Information Technology Enabled Services, also referred to as IT-ITeS is a sector which has been skyrocketed in the last few years. The role of IT sector cannot be underestimated when it comes to improving the shape of Indian business standards. Many business processes including business process outsourcing (BPO), online services, software management, consultancies and software development are a part of this sector. As per an article published in The Times of India, the IT industry has played a crucial role in spreading the awareness of the Indias liberalization among people and telling them how important it is for their future. Dating back to 1990s, an export of approximately \$100 million with around 5,000 employees had been noticed. However, with the passing time, things in the sector have been improved. And, as a result, the countrys IT exports are now touching the numbers of \$70 billion with the involvement of 2.8 million employees. National Association of Software and Services Companies (NASSCOM), also known as the Indias software industry body, says that the Indias IT sector is expected to witness the growth at a rate of 12-14% during the time period 2016–2017. With this result, it would not be wrong to say that Indias IT industry has now evolved as one of the fastest emerging markets and very soon many more requirements in the field of software, hardware and other IT services can be expected to rise. The continued improvement in the domestic IT sector, conducive business environment, operational excellence, creation of urban infrastructure and abundant talent are the five major factors which actually decide the Indias position in the global offshore IT industry. There could be no denying to this fact that the global market and sustenance of its growth are the most crucial factors which have influenced the IT industry to a great extent. The IT community in the country has also witnessed some downfall due to the recession in the United States. The employment the computer and IT industry generates is seen as one of the biggest benefits. Export and Foreign Direct Investments are other crucial benefits. The presence of new markets in the South and South East Asia, Eastern Europe, Africa and Middle East has been noticed in the recent times. Many big countries across the globe consider India as a hub for IT outsourcing solutions. A wide number of job opportunities in the field have been produced and helped many people to gain advantage of serving the IT sector with their skills and knowledge. Experts say that the country has created a solid platform to overtake the USA when it comes to hiring a good number of software developers in the coming year.
