Read the following passage and answer the questions given after it.

Fentanyl is a synthetic, narcotic- like drug prescribed for severe pain. It helps reduce the feeling of suffering and can induce a state of extreme relaxation and happiness.

Fentanyl was made in 1960, and introduced as an anesthesia. It can be used as a patch, an injection, by smoking, or a lollipop. In India, it is mostly given as an analgesic in Operation Theatres and Intensive Care Units, especially after surgical procedures. It is sold under different brand names.

Fentanyl is up to hundred times more potent than morphine, and can be 30-50 times more powerful than heroin. While it is used for medical treatment, it can also be misused. According to the Centers for Disease Control and Prevention, it is frequently mixed with heroin, cocaine or both when sold illegally, in many cases without the user's knowledge.

Fentanyl can lead to death. An overdose can result in severe respiratory depression or arrest, during which breathing is slowed or stops altogether. But it is very difficult to determine the standard dose of drug which can lead to death. A dose that can kill one person may provide medicinal pain relief to another. But such painkiller drugs can, if taken for long, build up tolerance to them.

In March 2015, the US Drug Enforcement Administration issued a nationwide alert about the dangers of fentanyl. It said that Mexican authorities had shut down several laboratories. The fentanyl that was seized in Northeast US and California in 2014 had come from Mexican drug-trafficking organizations.

According to the DEA, the first case of fentanyl abuse came to light in mid-1970s. From 2005 -2007, the agency said, the drug caused more than 1,000 deaths in the US. The fentanyl that caused those deaths came from a single lab in Mexico that was later shut down.

Sub questions

 $\label{eq:Question Number: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical$

निम्नलिखित लेखांश पढ़ें और इसके बाद दिये गये प्रश्नों के उत्तर दें।

फेंटानिल गंभीर दर्द के लिए दी जाने वाले एक सिंथेटिक, नार्कोटिक-जैसी दवा है। यह पीड़ा को कम करने में सहायता करती है और अत्यधिक आराम और सुख की अनुभृति कराती है।

फेंटानिल 1960 में बनी थीं, और इसे एक एनेस्थीसिया के रूप में पेश किया गया था। इसका उपयोग पैच, इंजेक्शन, धूमपान या लॉलीपॉप के रूप में किया जा सकता है। भारत में यह ज्यादातर एनाल्जेसिक के रूप में ऑपरेशन थियेटर और इंटेसिव केयर यूनिट में प्रयुक्त होती है, विशेषकर सर्जिकल प्रक्रियाओं के बाद। इसे अलग-अलग ब्रांड नामों के तहत बेचा जाता है।

फेंटानिल मॉर्फिन की तुलना में सौ गुना तक अधिक शक्तिशाली है और हेरोइन से 30-50 गुना अधिक शक्तिशाली हो सकती है। हालाँकि यह चिकित्सकीय उपचार में प्रयुक्त होती है, लेकिन इसका दुरुपयोग भी किया जा सकता है। 'सेंटर्स फ़ाॅर डिज़ीज़ कंट्रोल एंड प्रिवेशन' के अनुसार इसे अक्सर हेरोइन, कोकीन या दोनों के साथ मिलाकर अवैध रूप से बेचा जाता है। कई मामलों में तो उपयोगकर्ता को इसके बारे में जानकारी भी नहीं होती।

फेंटानिल से मृत्यु भी हो सकती है। अधिक मात्रा में उपभोग से गंभीर 'रेस्पिरेटरी डिप्रेशन' या 'अरेस्ट' सकता है, जिसके दौरान श्वसन बहुत धीमा हो जाता है या पूरी तरह रुक जाता है। लेकिन दवा की उस मानक खुराक को निर्धारित करना बहुत मुश्किल है जिससे मृत्यु हो सकती है। किसी एक खुराक से जहाँ एक टयक्ति की मृत्यु हो सकती है, वहीं उतनी ही खुराक किसी अन्य टयक्ति के लिए दर्द की दवा का काम कर सकती है। लेकिन ऐसी दर्द निवारक दवा के लंबे समय तक सेवन से इसकी सहयता (टॉलेरेंस) बनने लगती है, यानी शरीर पर असर कम होने लगता है।

मार्च 2015 में अमेरिकी इग एन्फोर्समेंट ऐडिमिनिस्ट्रेशन ने फेंटानिल के खतरों के बारे में एक राष्ट्रव्यापी चेतावनी जारी की थी। कहा जाता है कि मेक्सिकी अधिकारियों ने कई प्रयोगशालाओं को बंद कर दिया था। 2014 में पूर्वोत्तर अमेरिका और कैलिफोर्निया में जब्त किया गया फेंटानिल मेक्सिकों के इग-तस्करी संगठनों से आया था।

डीईए (DEA) के अनुसार फेंटान्टिल के दुष्प्रयोग का पहला मामला 1970 के दशक के मध्य में सामने आया था। एजेंसी ने बताया कि 2005-2007 के दौरान अमेरिका में इस दबा के दुरुपयोग से 1,000 से अधिक मौतें हुई थीं। इन मौतों के लिए ज़िम्मेदार फेंटानिल मेक्सिको की एक ही प्रयोगशाला से आयी थीं; इस प्रयोगशाला को बाद में बंद कर दिया गया था। Question Number: 53 Question Id: 5832241222 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes

Women have been the victims of violence all through the ages in all societies, cultures, regions and communities across the world. India, which is known for worshipping women, records the highest number of violence cases, in terms of domestic, physical, public and emotional violence. This has been into practice since the post Vedic period. The doors of educational, economic, social, political and cultural opportunities were gradually closed for them. Giving birth to a boy was the matter of rejoice, while the girl child remained unwanted and often killed after birth. Their personal freedom in respect of movement, dress, diet and marriage came to be dominated by men. Not just this, people started to enslave the women of their family. Various obligations, restrictions and regulations were imposed on them and harsh punishments were given, if a woman violated them. Thus, violence against women came to have a societal sanction. As the time progressed, several ills began to creep up in the society. The rights of widows began to be denied and practice of sati was introduced. The wife being beaten by the husband got religious and social sanction. The violence further increased, when young girls began to be forced to serve as the devdasis in the temples. This gave birth to prostitution as part of the religious life. Girls began to be married off at a tender age and in certain communities, the newborn girls began to be killed by the parents themselves. Polygamy took strong roots in the society and forced marriages became a common trend. The colonial India did impose some legislation that momentarily brought a halt to violence. But largely, the British displayed indifference to the status of women. After Independence, violence against women grew in all its dimensions. With the progress of science and technology, female foeticide also progressed. Most of the doctors got involved into illegal screening of fetus and if a girl was detected, it was killed in the womb itself. The problem with Indian society is that a woman is believed to be a weaker sex, which remains dependent on man and therefore can be treated badly. A woman, who is uneducated, unskilled and economically dependent, always feels that she has no choice besides bearing all the atrocities heaped on her. The society needs to be sensitized to the fact that women are not meant to be treated as doormat or punching bag. Women must organize themselves in groups and raise a collective voice against all such issues. United efforts can create a public opinion and outcry against the humiliations done to women can work as a deterrent. Attitudinal change is required right from the home, to be able for women to stand with dignity in this world.
