# Read the following passage and answer the questions based on it.

A remarkable feat was achieved in the history of Indian Ornithology, with a Mumbaikar having travelled the entire country, 80,000 km, to record 1,128 bird species. This includes rare ones like the Himalayan Forest Thrush, Tibetan Lark, and Chinese Francolin.

Wildlife biologist, Shashank Dalvi, was on the project "big year". Under this challenge, promoted by Cornell University, birders take up a geographical location to record its bird diversity. Dalvi is the first Indian to map the country's entire coastline, rainforests, sanctuaries and deserts to record bird species.

Such exercises are important in view of shrinking wildlife habitats and climate changes. With temperatures rising, these species may be lost forever in a few years. The data collated through such efforts can inform us of their changing migration and distribution patterns through seasons.

India is among the 12 'mega-bird diversity countries of the world' with an estimated 1,314 species. Over 13 % of the world's birds are found in India, as per Mumbai Natural History Society. Of these, 150 have been seen only once or twice in the history of bird sighting in India. Dalvi undertook this feat from 1 January-31 December 2015. He spent four months in India's Northeast - the richest belt housing about two-thirds of India's bird diversity.

He spotted several species here like Lord Derby's Parakeet and Gould's Shortwing in eastern most parts of Arunachal; Burmese Shrike in Nagaland and Chinese Francolin in Manipur. In Kargil, Dalvi spotted the Long Billed Bush Warbler, not seen in India since 1977. He saw Tibetan Lark in Ladakh and the Rufous-vented Prinia in Punjab.

Another large bird reserve Dalvi found was in the Andaman and Nicobar islands. Among his spottings were the Nicobar Jungle Flycatcher, Central Nicobar Serpent Eagle, Arctic Warbler etc. A certain category of birds, called 'Pelagic' or 'offshore' birds, needed him to travel beyond the beaches of Kerala and Karnataka. There he sighted Storm Petrels, Skuas and Shearwaters.

He made it to the Desert National Park, Rajasthan, just in time to spot seven-odd species of migratory birds. These include the Spotted Flycatcher, European Nightjar and the Great White Throat.

He said, "Several birds I saw are in the list of 'Threatened Species'. With this documentation, we will certainly understand them better and they will remain in our memories."

नीचे दिये गए पाठ्यांश को पढ़ें और इसके बाद दिये गए प्रश्नों के उत्तर दें।

भारतीय पक्षीविज्ञान के इतिहास में एक महत्वपूर्ण उपलब्धि हासिल की गई, जब एक मुंबईवासी ने पिक्षियों की 1,128 प्रजातियों को रिकॉर्ड करने के लिए सारे भारत की 80,000 किमी की यात्रा की। इसमें बेहद दुर्लंभ हिमालयन फोरेस्ट थ्रभ, तिब्बतन लार्क, और बाइनीज फेंकोलिन शामिल हैं।

वन्य जीवन जीवविज्ञानी शशांक दलवी, "बिग ईअर" परियोजना पर काम कर रहे थे। कोरनेल विश्वविद्यालय द्वारा पोन्नत इस चुनौती के तहत, पक्षी प्रेमियों को पक्षी विविधता रिकॉर्ड करने के लिए एक भौगोलिक स्थान लेना होता है। दलवी पहले भारतीय हैं जिन्होंने पक्षियों की प्रजातियों को दर्ज करने के लिए देश की संपूर्ण समुद्र तटीय रेखा, वर्षा बनों, अभ्यारण्यों, और मरुस्थलों की खाक छानी है।

ऐसे कार्य घटते वन्य आवास और जलवायु परिवर्तन की हृष्टि से महत्वपूर्ण हैं। बढ़ते तापामान के साथ, कुछ ही वर्षों में ये प्रजातियां सदा के लिए समाप्त हो सकती हैं। ऐसे प्रयासों से संकलित डेटा से हमें उनके बदलते अप्रवास तथा विभिन्न मौसमों में उनके वितरण पैटर्न की जानकारी मिल सकती है।

भारत 'दुनिया की 12 अति विशाल पक्षी विविधता वाले देशो' में से एक है जिसमें अनुमानित 1,314 प्रजातियां पाई जाती हैं। मुंबई नेपुरल हिस्ट्री सोसायटी के अनुसार दुनिया के पक्षियों का 13 प्रतिशत से ज्यादा भारत में पाया जाता है। इनमें से 150 भारत के पक्षी देखने के

इतिहास में केवल एक या दो बार दिखाई दिए हैं। दलवी ने 1 जनवरी -31 दिसंबर 2015 तक यह काम किया। उन्होंने भारत के उत्तर-पूर्व में चार माह बिलाएं - जो सबसे समृद्ध जगह है और भारत की पक्षी विविधता का लगभग दो-तिहाई वहां पाया जाता है।

उन्होंने यहाँ अनेकों प्रजातियों को देखा जैसे अरुणाचल प्रदेश के सुदूर पूर्वी आगों में लॉर्ड डबीज पराकीट और गोउल्ड शोर्टइंग; नागालैंड में बमीज शराइक और मणिपुर में चाइनीज फेंकोलिन जैसी कई प्रजातियां यहां देखी। कारगिल में, दलबी ने लॉन्ग बिल्ड बुश बार्बलर देखा, जो 1977 के बाद से भारत में नहीं देखा गया है। उन्होंने तदाख में तिब्बलन लार्क देखा और पंजाब में रोफुस-वेंटेड परिनिआ देखी।

दलबी को अंडमान निकोबार द्बीप समूह में पक्षियों का एक और अभ्यारण्य मिला। वहां उन्हें: निकोबार जंगल फलाईकेचर, सेंट्रल निकोबार सपेंट ईगल, आर्कटिक बार्बलर आदि मिलं। पिक्षयों की एक विशेष श्रेणी, जिन्हें 'पिलाजिक' या 'ऑफशोर' पक्षी कहा जाता है, के लिए दलवी को केरल तथा कर्णाटक के तटों के पार जाकर यात्रा करनी पड़ी। वहां उन्हें स्टार्म पेट्रेलस, सकुआस और शिअरवाटर्स मिला।

बह मरु राष्ट्रीय उद्यान, राजस्थान में भी गए और वहां उन्होंने अपवासी पक्षियों की सात अनूठी प्रजातियां देखी। इनमें स्पोटेड फलाईकेचर, यूरोपियन नाइटजार और रोट व्हाइट थोट शामिल हैं। उन्होंने कहा, 'मैंने कई ऐसे पक्षी देखें जो 'संकटरास्त प्रजातियो' की सूची में हैं। इस दस्तावेजीकरण से, हम निश्चित तौर पर उन्हें बेहतर ढंग से समझ पाएंगे और वे हमारी यादों में बसे रहेंगे।" Question Number: 53 Question Id: 206205714 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes

Young brains can be easily influenced and shaped up. The things learnt at an early age always form the base. of an individuals true nature. Getting engaged in a beauty course is one such art that has too much to give to its learners. Many individuals from across the world now prefer to enroll in a beauty school to learn different useful fundamentals of the beauty industry. Honestly speaking, it is an inspiring medium for the new generation. Parents can enroll their children in any of the renowned beauty schools that are near to their homes. This can be the best experience of their lifetime which they could cherish forever. The beauty schools have all the modern equipments teaching the students. They also have a staff of well trained and devoted faculty who enjoys in teaching their students. Students here learn their first lesson of concentrating by listening keenly to the instructions given by the instructors and then further applying them with the help of the equipment. Next very important lesson they learn is to work in a team. Thus they understand how every action is been carried on successfully simply by having faith in each other. Learning beauty skills has become today as a good rewarding opportunity in a highly demanding environment. This is a kind of activity that one can develop and improvise without expecting to make a career in the field. One can also simply enjoy the moments while been in the process of implementing techniques of hairdressing and other beauty care operations. Not only beauty schools focus on helping participants to learn various vital fundamental, but they also encourage them to be aware of the brighter scope of this industry. Some of the points covered in such schools are appreciating the beauty with some beautiful words is something that every student is taught by the faculty of such schools. It is also their responsibility to assist students learn on how to help individuals look gorgeous with the implementation of right amount of beauty products. They advise you to look beautiful always since people trust only on those beauticians who look confident and good looking. As a part of a beauty school you also get a chance to learn various procedures that can help you to create or enhance beauty artificially. The complete range of technical skills is imparted to students ranging from giving a thorough knowledge on various facial treatment options to providing learning opportunities for different hair treatment and styling skills. Students are also taught about sales and marketing, refined people skills and the fundamentals of psychology. Such skills help to build a positive attitude and aid them to have an improved self confidence.
