Good project management establishes the arrangements for directing, managing and controlling a project or change initiative in a way that maintains a focus on, and delivers, the intended benefits. It is an important skill, particularly as so much of our work falls into discrete engagements with specific outcomes. Project management is a widely recognised professional discipline, and as a consequence there is a range of professional development courses available both within and outside organisations.

Typically, project management comes into use when a temporary organisation is required in order to deliver a specific output within a defined timescale. It falls within the group of disciplines which may be used to prioritise, coordinate and manage change at all levels within an organisation.

The standard methodology follows the five stages of a programme – Strategy and Assess, Design, Construct, Implement and Operate and Review – but the simplified approach within this module follows Start, Plan, Do and Finish. The first of these stages is often the most intensive –leading to sign-off for the project.

A project officer is critical to manage a programme or a project. Typically, for a larger programme or project because of its sheer scale, this role is taken up by a Project Management Office comprising of a number of experts. The key roles of a Project Manager or a Project Management office include the following:

- · planning and status reporting
- · risk, issue, assumption and dependency management
- · business case development, monitoring and benefits realisation planning
- · supporting effective project (and programme) governance
- · document control and configuration management
- · change control
- project management support.

अच्छा परियोजना प्रबंधन, एक परियोजना या परिवर्तन पहल के इस तरह से निर्देशन, प्रबंधन एवं नियंत्रण के लिए व्यवस्थाओं की स्थापना करता है, जो इच्छित लाओं पर केन्द्रित होता है तथा उन्हें परिणामित करता है। यह एक महत्वपूर्ण कौशल है, विशेषकर चूँकि हमारे अधिकाँश काम विशिष्ट परिणामों के साथ असतत अनुबंध के दायरे में आते हैं। परियोजना प्रबंधन एक व्यापक रूप से मान्यता प्राप्त पेशेवर शिक्षण है जिसके फलस्वरूप, संगठनों के भीतर तथा बाहर, दोनों ही स्थानों पर व्यावसायिक विकास पाठ्यक्रमों की एक शृंखला उपलब्ध है।

साधारणतया, परियोजना प्रबंधन तब उपयोग में आता है, जब एक अस्थायी संगठन को एक निर्धारित समय सीमा के भीतर एक विशिष्ट आउटपुट प्रदान करने की आवश्यकता होती है। यह उन विषयों के समूह के अंतर्गत आता है, जिन्हें एक संगठन के सभी स्तरों पर परिवर्तन के प्राथमिकीकरण, समन्वयन एवं प्रबंधन के लिए इस्तेमाल किया जा सकता है।

मानक कार्यप्रणाली द्वारा समर्थित एक कार्यक्रम के पांच चरण निम्नलिखित हैं -रणनीति एवं आकलन, डिजाइन, निर्माण, क्रियान्वयन एवं प्रचालन तथा समीक्षा -किन्तु इस मॉड्यूल के अंतर्गत सरलीकृत दृष्टिकोण -प्रारंभ करें, योजना बनाएं, काम करें तथा समाप्त करें, का अनुपालन करता है। इन चरणों में से प्रथम चरण प्रायः सर्वाधिक गहन होता है -जो कि परियोजना की समाप्ति का पथप्रदर्शक होता है।

एक परियोजना अधिकारी, एक कार्यक्रम या एक परियोजना का प्रबंधन करने हेतु महत्वपूर्ण है। आमतौर पर, एक बड़े कार्यक्रम या परियोजना के लिए, उसके विशाल स्वरूप के कारण, इस भूमिका का निर्वाह बहुत से विशेषज्ञों सहित एक परियोजना प्रबंधन कार्यालय द्वारा किया जाता है। एक परियोजना प्रबंधक या परियोजना प्रबंधन कार्यालय की मुख्य भूमिकाओं में निम्नलिखित शामिल होते हैं:

नियोजन एवं स्थिति रिपोर्टिंग जोखिम, मुद्दा, अनुमान एवं निर्भरता प्रबंधन व्यापारिक केस के विकास, निगरानी एवं लाभ प्राप्ति की योजना बनाना प्रभावी परियोजना (एवं कार्यक्रम) गवर्नेंस का समर्थन करना दस्तावेज़ नियंत्रण एवं विन्यास प्रबंधन परिवर्तन नियंत्रण परियोजना प्रबंधन समर्थन।

One of the biggest questions to be answered is, can we provide cheap sources of irrigation to marginal farmers in the remotest part of the country? With an aim to address the problems associated with irrigation for small and marginal farmers, XYZ Inc. has invested an amount of £ 80 million researching innovative irrigation models across the world. It has collated and developed a repository of local innovations across the world. A technology recently promoted by it focuses on rural innovation in water management with the launch of its treadle pump called "Jal Jeevan".The product has been introduced through XYZ's "Kheti ko badaana he" portfolio which is a sustainable business model that addresses the fundamental needs of those living at the base of the economic pyramid and creates solutions to help them grow. The word "Jal Jeevan" originated from the word "Water and Life" or which highlights the relationship of life with water. The innovation in focus is the treadle pump, which is a foot-operated device and can pump water from shallow aquifers or surface water bodies such as ponds, tanks or tube well from a maximum depth of 20 feet. The Jal Jeevan Pump represents an innovative global, OEM-engineered solution for rural water management need of small holder farmers. The pump does not require electricity and is easy to operate with minimal number of removable parts and no additional tools required.The treadle pump does not burden the farmer with additional cost. It is expected that marginal farmers may find it much easier to embrace the technology. However, other issues such as • Access to surface water or shallow ground water • Maintenance cost of treadle pumps• Availability of spares The potential of the pumps will be limited by its inability to help in drawing water from deep wells. However, it will be interesting to note, if the treadle pumps can reduce the cost of cultivation by a significant margins.
