Read the passage given below and answer the questions:

There was lot of furors over a reported news item in the American papers about an attempt to locate a nuclear– fueled power–pack on the heights of Nanda Devi.

The report raised fears about the possibility of contamination of the sacred Ganga waters and a possible hazard to our environment and people.

I share this concern and so I wish to explain to the Honorable Members and public at large.

As soon as these reports came to our attention, we expressed our grave concern to the US authorities and asked them to explain. We have also made thorough enquiries at our end to obtain complete details.

In the light of the international situation prevailing then and scientific developments taking place both far and near, it was decided jointly by the Governments of India and the US that a remote sensing device with nuclear power-pack be installed near the highest point of Nanda Devi. This would secure information about missile developments in the neighbouring areas.

Accordingly, an Indian mountaineering expedition went up the Nanda Devi followed by a joint Indo-American expedition scientifically equipped with the device to be installed at a height of 25,000 feet.

When the expedition was approaching the summit, they encountered a deadly blizzard forcing the team to retreat to the lower camp at 23,000 ft. The descent conditions were equally bad so to the team decided to leave the power pack hidden in a secure place.

When winters came we had to wait for obvious reasons. In spring, another expedition went up to retrieve and install the device.

When the party reached the area they saw that a major avalanche had occurred and had buried it. The attempt was futile. Other attempts were then made by ground and aerial search parties aided by super sensitive scientific equipment to trace the power-pack but all efforts proved in vain.

The experts concluded that if the power-pack had broken, it would have been detected by the equipment. It was likely that the device had got buried deep somewhere into a neighbouring crevice by the avalanche. Searches continued till 1968 but without any results.

नीचे दिए गए गद्यांश को पढें और सवालों के जवाब दें:

नंद देवी की ऊंचाइयों पर परमाणु-ईंधन वाले पावर-पैक का पता लगाने के प्रयास के बारे में जानकारी अमेरिकी अखबारों में सुर्खियों में थी। रिपोर्ट पवित्र गंगा जल के प्रदूषण की संभावना और हमारे पर्यावरण और लोगों के लिए संभावित खतरे की समस्या के बारे में थी। मैं इस समस्या को साझा करता हूं और इसलिए मैं माननीय सदस्यों और जनता को बड़े पैमाने पर समझाऊंगा।

जैसे ही ये रिपोर्ट हमारे सामने आईं, हमने अमेरिकी अधिकारियों के समक्ष इस समस्या को रखा और उन्हें व्याख्या करने के लिए कहा। हमने पूर्ण जानकारी प्राप्त करने के लिए हमारी ओर से पुछताछ की।

अंतरराष्ट्रीय स्थिति के चलते, तब प्रचलित और वैज्ञानिक विकास दोनों बहुत दूर हो रहे थे, इसलिए भारत और अमेरिकी सरकारों द्वारा संयुक्त रूप से तय किया गया था कि नंदा देवी के उच्चतम बिंदु के पास न्यूक्लियर पॉवर-पैक के साथ एक रिमोट सेंसिंग डिवाइस स्थापित किया जाएगा। यह पड़ोसी क्षेत्रों में मिसाइल विकास के बारे में जानकारी प्राप्त करेगा।

तदनुसार, भारतीय पर्वतारोहण अभियान नंदा देवी के बाद 25,000 फीट की ऊंचाई पर स्थापित होने वाले डिवाइस से लैस एक संयुक्त इंडो-अमेरिकन अभियान के बाद वैज्ञानिक रूप से सुसञ्जित हुआ।

जब अभियान शिखर सम्मेलन के निकट आ रहा था, तो उन्हें अपने टीम को 23,000 फीट पर निचले शिविर में वापस जाने को मजबूर कर दिया गया। अवरोहण की स्थिति खुराब होने के कारण, टीम ने एक सुरक्षित स्थान पर पॉवर-पैक को छिपाने का फैसला किया।

जब सर्दियों आई तो हमें स्पष्ट कारणों का इंतजार करना पड़ा। वसंत ऋतू में, डिवाइस को पुनर्प्राप्त करने और स्थापित करने के लिए एक और अभियान चलाया गया।

जब उनकी टीम उस स्थान पर पहुंची तो उन्होंने देखा कि वह स्थान हिमस्खलन की चपेट में आ गया था और यह इसमें दब गया था। प्रयास व्यर्थ था। फिर पॉवर-पैक का पता लगाने के लिए सुपर संवेदनशील वैज्ञानिक उपकरणों की सहायता से खोजने का प्रयास किया गया लेकिन सभी प्रयास व्यर्थ साबित हुए। विशेषज्ञों ने निष्कर्ष निकाला कि यदि बिजली पैक टूट गया था, तो यह उपकरण द्वारा पता चला होगा। ऐसी संभावना थी कि उपकरण हिमस्खलन से आसपास कहीं अंदर दब गया था। खोज 1968 तक जारी रही लेकिन बिना किसी परिणाम के।

Returning to work after maternity leave or after spending a few years at home with the kids is a big transition period with many changes to manage. Listed below are several strategies that must be kept in mind, so that you feel in control and competent. Create your packing list. You will quickly learn that if you have a list of things to pack, you will feel more confident and less stressed in the morning. You will feel confident walking out the door and not nervous that you forgot something. If you were not a list-maker before you had a baby, it is worth becoming one. Plan a short day trip with your child. Before you head back to work, go on a short day trip with your baby. You will get a feel for what it is like to pack up your baby and get yourself ready to be seen in public. It will feel like you are heading out to work, but you are actually going out to have fun with your baby. Wake up early as if you are heading out to work. Get yourself ready first and then get the baby ready. Feed her breakfast, get her dressed, pack up her things and then head out. While you are at it, time yourself to see how long this takes you. Once you are out of the door, go enjoy yourself for the day. You may feel a bit tired, but it is surely a nice test run and you get to have fun with your little one for the morning. Try a trial run, both for you and your child. Schedule a day with your child care provider to do a trial run. Drop your child off for a few hours. You would not feel the pressure you may feel about having to go to work. Take advantage of this free time and perform different tasks that you have been thinking about, for example, shopping, haircut and so on. When you pick up your child, schedule some time to visit and help your child adjust to a new caregiver. Make sleep a priority. Your first week back will probably be draining, no matter how prepared you are. Go to bed as soon as possible. Prioritize ruthlessly. Working parents need to aim to be brutally efficient. To help be ruthless about it, identify the few key tasks that must be completed to get you up to speed at work. Do not be hard on yourself. You never know for sure how you will feel during your transitional challenge, but do not make any hasty decisions about your future in the very first week. Instead, notice how you feel and what you like or dislike. Store these observations for later reflection. If uneasy feelings persist after a few weeks, you may want to change your work or care situation. Give yourself a reward for a job well done. After all of this planning and transition, you deserve a treat.
